FROM: Lauren Davis, MD  
Director of Student Health Services

TO: All Entering Students of LSU Health Sciences Center

Congratulations on your acceptance. We are eagerly anticipating your arrival at LSUHSC and your addition to the LSUHSC family.

There is a health form in your packet requiring medical history information, a physical examination, and specific lab and immunization reports. A completed health form is a mandatory component of the registration process. The form must be complete and returned to the LSUHSC student health office no later than three (3) weeks prior to registration. Your health care provider should perform all examinations, laboratory tests, and immunizations.

**WARNING:** Due to the large volume of health forms and records being received by Student Health during registration periods, neither Student Health nor Student Affairs offices can verify when your health care provider actually mailed or faxed materials to Student Health. Materials received on the day of registration may not be entered into the computer until the next day. If this occurs, a block will be placed on your record and registration (enrollment) into your respective program will be denied. If you are not able to register you will be subject to late registration fees AND your student loan money will not be released until the computer records are updated.

Because all student health records are confidential, only Student Health Office staff maintains them. Therefore, should you have any questions regarding your file, you may contact the office at the above address/phone/fax.

Instructions for completing the health form:

1. You should complete the medical history on the front page including:
   a) PERSON TO BE NOTIFIED IN THE EVENT OF SERIOUS ACCIDENT OR ILLNESS
   b) YOUR FAMILY PHYSICIAN (Please date and sign)
   c) MEDICAL CONSENT (Please date and sign)

2. Your health care provider should complete the information on the back page including:
   a) MEDICAL EXAMINATION - to be completed not more than 90 days before registration,
   b) MANDATORY TESTS and IMMUNIZATIONS* - with dates specified and reports of all labs and titers attached.

* Especially important is proof of immunity to Hepatitis B or documentation that the Hepatitis B vaccine triple series has begun (1st immunization) and is current prior to registration. Specifically, the 2nd immunization must be given 30 days following the 1st immunization and the 3rd immunization must be 6 months following the first immunization. **If the 2nd or 3rd immunization is due before registration, you must show proof of them to avoid a block status.**

Once you are a registered LSUHSC student, the remaining Hepatitis immunizations, as well as yearly updates of Tuberculin skin tests are required. It will be your responsibility to “mark your calendar” for future immunizations/test dates. Once again, it is conceivable that you could be blocked from registering, receiving financial aid, final grade reports, transcripts, or graduation materials if your health record is not kept current.

Again, welcome aboard and we look forward to serving you.
Instructions for Completing Mandatory Tests and Immunizations

A) Varicella titer (#1): You must prove that you are immune to chicken pox by titer. You must have the titer drawn. If you are not immune by titer, you must complete varivax immunization unless there is a health reason not to be vaccinated. A history of chicken pox is NOT sufficient. Provide a copy of the lab report to student health.

B) Measles, mumps and rubella titer (#2, 3, and 4): You must prove that you are immune to measles, mumps and rubella by titer (one titer for each item) AND provide records that indicate you have been fully immunized against these diseases. One MMR vaccination after you are at least 12 months old, and a second immunization no sooner than 28 days after the first unless there is a health reason not to be vaccinated.
   c) If you were born before 1957, you are presumably immune.
   d) To prove immunity by titer, you must draw all three and provide student health with a copy of each of the three lab results.
   e) If you have a low titer <0.91 you should receive a booster.

3. Tetanus (#5): You must document a tetanus booster or Tdap within the 10-year period before you register (e.g., if you register in 2018, you must have had a tetanus vaccination anytime between the years 2009 and your registration date in 2018).

4. Hepatitis B (#6): You must document Hepatitis B vaccination(s). There are three shots in the series. The second shot is given no earlier than 30 days after the first. The final shot is given no earlier than 6 months after the first (or at least 5 months after the 2nd shot).
   a) You may not have enough time to complete the series before you register.
   b) If your series is current (no shot is due on the day you register), you will not be blocked for your first registration.
   c) You must complete the series while at school or you WILL BE BLOCKED at future registrations.
   d) You must prove immunity by Quantitative HepB SAB titer. If you have not received all injections, you are not likely to be immune, and should not draw a titer. Once completing the series and draw the titer, please provide student health with a copy of the lab results.

5. TB skin test (#7 & 8): You must document that you have not been exposed to tuberculosis (TB results are negative).
   a) All results should be reported in terms of the observed millimeters of induration (e.g. -0- mm induration). This form should include the date placed, date read and location site (e.g. LFA or RFA). The form should be signed by a licensed health care provider.
   b) You will need a chest X-Ray ONLY IF your TB skin test was positive.
   c) You MAY document post-exposure prophylaxis if you wish. We will include this with your student health record.

6. Meningococcal Vaccine (#9): You must document a Meningococcal vaccination or sign a waiver if you do not want the vaccine.
