FACULTY AND STAFF

FACULTY

KELLY L. ALIG, PHD, LOTR
Department Head and Assistant Professor
Academic Background: Bachelor of Science in Occupational Therapy; Master of Arts in Occupational Therapy; Ph.D. in Educational Administration (Higher Education Concentration)
Clinical Experience: Adult Physical Disabilities
Areas of Experience and Interests: Neurorehabilitation; Lymphedema; Fieldwork Experience; Teaching and Learning
(504) 568-4303
kalig@lsuhsc.edu

MARK BLANCHARD, OTD, LOTR, ATP
Instructor
Academic Background: Bachelor of Science in Marketing; Master of Occupational Therapy; Doctor of Occupational Therapy
Clinical Experience: Adult Physical Disabilities
Areas of Experience and Interests: Neurorehabilitation; Assistive Technology; Traumatic Brain Injury; Upper Extremity Rehabilitation; Veterans’ Healthcare
(504) 568-4309
mblan5@lsuhsc.edu

BARBARA DOUCET, PHD, LOTR
Associate Professor
Academic Background: Bachelor of Science in Occupational Therapy; Master of Health Science; Ph.D. in Kinesiology/Human Movement Science
Clinical Experience: Adult Physical Disabilities
Areas of Experience and Interests: Recovery of motor function and motor control. Response of muscle to neuromuscular electrical stimulation. Promotion of health and recovery to achieve optimal ADL performance.
(504) 568-7697
bdouc3@lsuhsc.edu

INGRID FRANC, PHD, LOTR
Academic Fieldwork Coordinator and Assistant Professor
Academic Background: Bachelor of Science in Occupational Therapy, Master of Science
in Healthcare Management, Ph.D. in Occupational Therapy
Clinical Experience: Adult Physical Disabilities
Areas of Experience and Interests: Acute care; Low vision; Chronic disease management; Neurorehabilitation
(504) 568-4304
ifran1@lsuhsc.edu

SHANNON MANGUM, MPS, LOTR
Assistant Professor
Academic Background: Bachelor of Science in Occupational Therapy; Master of Pastoral Studies
Clinical Experience: Mental Health, Wellness Promotion, Community Programming
Areas of Expertise and Interest: Psychosocial Functioning; Wellness; Spirituality: Program Development
(504) 568-4310
smangu@lsuhsc.edu

KERRIE RAMSDELL, MS, LOTR
Assistant Professor
Academic Background: Bachelor in Science in Psychology; Master of Sciences in Occupational Therapy
Clinical Experience: Pediatrics: Early Intervention; Sensory Integration Clinic, Outpatient Pediatrics
Areas of Expertise and Interest: Early Childhood Intervention; Human-Animal Bond in Therapy; Sensory Integration.
(504) 568-4305
kramsd@lsuhsc.edu

STAFF

LEE BARTON
Department Coordinator
(504) 568-4302
lbart1@lsuhsc.edu
1. Each student in the program has been assigned an academic advisor. This assignment continues until the student graduates or leaves the program.

2. Faculty advisors are available on an as-needed basis (rather than at designated times or intervals). Students or faculty may initiate a meeting.

3. The student or faculty member will need to make an appointment at a time that is convenient to both parties. There are several ways in which one can make an appointment:
   
   a. A student may stop by a faculty member’s office.
   b. A telephone call can be made or an email sent.
   c. A student can leave a message in writing in the faculty advisor’s box (located in the OT Office); faculty can leave messages in the student’s box.
   d. If the student has a class with his or her advisor, the student or the advisor can ask for an appointment before class, during a class break, or after class. (Keep in mind that faculty often do not take their calendars to class, so the student may need to accompany the faculty advisor to his or her office after class to actually set the appointment.)

   If you leave a message (either over the phone, in writing, or via email), indicate two to four possible meeting times in order to expedite the process of establishing an appointment.

4. If a faculty member initiates a meeting with a student, either as the student’s advisor, or instructor, the faculty may record the counseling session in the student’s Advisor Log located on the shared faculty drive. The student has the right at any time to request to see the records for his or her sessions. Additionally, if the faculty member deems it necessary, the faculty may record the counseling session on a Student Counseling Form and request that the student read and sign the session summary. (See Student Counseling Record form).
STUDENT COUNSELING RECORD

Student Name__________________________________________________________

Date______________ Time:_____________ to _______________

Faculty Present________________________________________________________

Recorder____________________________________________________________

Provide narrative of major points covered during the meeting. Summarize action steps to be completed by student and/or faculty, including timelines and persons responsible, if necessary.

I have read this counseling record summary.

Student Signature______________________________________________
Occupational therapy (OT) is a health and rehabilitation profession whose practitioners provide services to clients of all ages, enabling them to do the day-to-day activities that are important to them despite impairments, activity limitations, or participation restrictions. Occupations are another name for these day-to-day activities. Occupations are goal-directed pursuits that typically extend over time; have meaning to the performer, and involve multiple tasks. Occupational performance areas consist of activities of daily living, work/productive, and play/leisure activities. A holistic philosophy is employed to assist individuals whose function has been impaired by disease, injury, or disorders of a physical, mental, or social nature. Occupational therapists, through their interventions, enable people to regain health as well as function in life roles.

Intervention involves therapeutic use of meaningful and purposeful occupations, adaptation of environments and processes, promotion of health and wellness, and use of assistive technology and ergonomic principles.

The Louisiana State University Health Sciences Center-New Orleans Department of Occupational Therapy offers a program leading to an entry-level Master of Occupational Therapy (MOT) degree. The program is accredited by the Accreditation Council for Occupational Therapy Education (ACOTE). A career in occupational therapy offers variety, independence, creativity, and a wide choice of career paths. Employment opportunities for occupational therapists are available in a variety of institutional, (e.g., inpatient hospitals, nursing facilities), outpatient, and home and community settings (home care, schools, day-care centers, wellness centers).

Graduates of the program are eligible to sit for the National Occupational Therapy Certification Board (NBCOT) exam. Successful completion of this exam qualifies the individual as an Occupational Therapist, Registered (OTR) and makes him or her eligible to be licensed as an occupational therapist in most states, including Louisiana. A felony conviction may affect a graduate’s ability to sit for the NBCOT certification examination or attain state licensure.
VISION

The Department of Occupational Therapy at Louisiana State University Health Sciences Center—New Orleans is committed to promoting occupational therapy in communities through collaborative efforts in education, research and scholarship, and service, thereby maximizing quality of life.

CORE VALUES

- We value and encourage INQUIRY and LIFE-LONG LEARNING.
- We RESPECT the rights of others and view diversity as an opportunity for enrichment and growth.
- We value SERVICE and ADVOCACY to the community and our profession.
- We encourage INNOVATION and the use of creative talents to achieve excellence.
- We acknowledge ADAPTABILITY to prevail in the presence of change and uncertainty.
- We value INTEGRITY as a support to COLLABORATION.
- We value the promotion of QUALITY OF LIFE.

MISSION

The mission of the Occupational Therapy Program at Louisiana State University Health Sciences Center—New Orleans is to:

- Educate students to become reflective and empathetic practitioners who provide excellent quality care while maintaining high ethical standards.
- Foster a spirit of inquiry and scholarly development so both faculty and students experience intellectual growth and cultivate habits that support life-long learning.
- Provide service in university, local, and state communities, and at national and international levels, to promote health and wellness for fellow human beings.
PROGRAM GOALS

Education

1. Educate students to become competent practitioners who engage in critical thinking, evidence based practice, and life long learning.
2. Facilitate the development of client-centered practitioners who provide quality care.

Research and Scholarship

3. Develop and disseminate knowledge that will validate and promote the practice of occupational therapy.

Service

4. Provide quality service at various levels: university, community, state, national, and international.
5. Advocate for universal access to services.
6. Promote the profession of occupational therapy.

PHILOSOPHY

View of the Person

Occupational therapists view people holistically as dynamic, open systems with biological, psychological, sociocultural, and spiritual dimensions that exert transactive influences. A person can be considered an individual system, or a member of a larger system such as a family, community, or nation. In the course of daily life, a person simultaneously experiences several roles, and engages in an array of occupations in a variety of contexts. We recognize the spectrum between disability/illness and wellness in individuals and that people possess varied abilities throughout life. We believe that people have a right to health and well-being, the right to create meaning in life through participation in occupation, and the right to collaborate in issues regarding their care.

People are challenged continually to adapt to contextual changes in order to fulfill needs and live meaningful, satisfying lives. We see humans as complex beings and through active engagement they evolve, change, adapt and are influenced by emerging knowledge and technologies. A transactive view of person, context, and occupation acknowledges that occupational behavior and environmental influences are integrally related and influence each other (AOTA, 2011; Law et al., 1996; Dunn, Brown, & McGuigan, 1994).
Role of Occupational Therapy

Occupational therapy enables people to participate in daily activities or occupations that are important to them despite impairments with body functions and structures, activity limitations, or activity participation restrictions due to contextual barriers (World Health Organization [WHO], 2001; Moyers, 1999). Occupational therapists collaborate with individuals, their families, communities, and populations to promote physical, cognitive, social, and emotional health, as well as function. Occupational performance is defined as the engagement in everyday activities in the areas of: activities of daily living, instrumental activities of daily living, rest and sleep, education, work, play, leisure, and social participation (AOTA, 2008). These are essential for participation in various life roles. Successful adaptation to performance challenges throughout life results in effective occupational performance, which supports health, wellness, and independence (Christiansen & Baum, 1997; WHO, 2001; AOTA, 2008).

The unique contribution of occupational therapy is its ability to maximize the fit between what individuals want and need to do and their capacity to perform important occupations. We acknowledge that participation in meaningful occupation is a determinate of health and supports participation in life situations. Throughout the intervention process, occupation is seen as both a means and an end, allowing for occupational therapy as a change agent and engagement in occupation as the ultimate goal in therapy (AOTA, 2008).

View of the Educational Process

The Department of Occupational Therapy is aligned with that of the AOTA’s Philosophy of Education (AOTA, 2014), Purpose and Value of Fieldwork Education (AOTA, 2009), and its Philosophical Base of Occupational Therapy (AOTA, 2011). The goal of the program is to graduate entry-level masters’ occupational therapists who are capable of making evidence-based decisions, engaging in critical thinking, and acting on professional ethics. Throughout the educational process, we support our students’ development to become life-long learners and agents of change for improvement in quality of life. Another essential outcome of the curriculum is to graduate therapists who exhibit respect for others, appreciation of interdependence, and the collaborative skills required in interprofessional practice.

Learning methods reflect occupational therapy philosophy and are grounded in learning theory with an emphasis on constructivist principles. Specifically, that knowledge is constructed rather than transmitted (Gijselaers, 1996). It is created by the individual through an active process of discovery and exploration. New knowledge is integrated only with discussion and elaboration on existing knowledge. Active and collaborative learning experiences promote the development of individual and group problem-solving strategies and facilitate students’ confidence in questioning and evaluating information (Johnson, Johnson, & Smith, 1998). Collaboration itself is a source of learning that supports acquisition and integration of information. Critical reasoning is threaded throughout the curriculum to provide opportunities to explicitly examine and practice critical and reflective thinking. Acknowledging various student learning preferences, instructional techniques include early field experiences to address actual client needs within the context of authentic practice environments, practice with hands-on competencies, the use of case-based method, application of evidence-based interventions, the use
of emerging technologies as well as various forms of instructor and peer feedback, lecture, and critical analysis of literature. Through the use of active learning, collaboration, leadership opportunities and self-reflection, students are able to integrate philosophical and theoretical knowledge, values, beliefs and ethics to prepare them with critical inquiry skills necessary for the development of their professional identity as an occupational therapist (AOTA, 2007, 2009).

**CURRICULUM DESIGN**

The Occupational Therapy Program’s mission and philosophy guide the content and learning experiences that compose the curriculum. The Person-Environment-Occupation Model (Law et al., 1996) and the Ecology of Human Performance Model (Dunn, Brown, & McGuigan, 1994) of occupational therapy contribute to the theoretical foundation of the program. Each model accentuates the transactive influence of the person, occupation, and context on the multidimensional nature of occupational performance.

Our commitment to the community shapes our curriculum design and provides opportunity for innovative development and delivery of occupational therapy services. We have built community partnerships that offer context-based educational experiences to our students. These experiences reinforce the skills necessary to create positive change. Our collective personal experiences and commitment to address unmet needs strengthens our desire to impact the environment in which we serve.

Two **primary educational outcomes** overarch more specific student outcomes. First, through active, context-based learning experiences, we support students to develop into life-long learners. Life-long learners are resourceful in obtaining and integrating information for competent service provision through reflection in all aspects of practice. Second, we provide opportunities for students to identify need for change in institution and community-based programs that support development of skills required of change agents.

Several **content themes** are woven throughout the curriculum sequence:

- **Client-centered Care.** The concept of client-centered care is based on accentuating the worth and holistic view of the individual and further defines the relationship of the individual and the therapist as a partnership (Law, Baptiste, & Mills, 1995). Client-centered care empowers the person, including the actual individual receiving occupational therapy services, family members, caregivers, or other people affecting that person’s occupational performance, to problem-solve in order to achieve goals. Within occupational therapy practice, clients may also include communities, organizations or populations (AOTA, 2008).

- **Occupation-based Practice.** Occupations are ordinary activities that bring meaning to the daily lives of individuals, families, and communities and enable them to participate in society. Meaningful activities are an innate need and right for all individuals and influence health and well-being throughout the lifespan. Occupations occur within diverse social, physical, cultural, personal, temporal, and/or virtual context. The dynamic relationship between individual’s intrinsic factors, the context in which they occur and the unique characteristics of the activity impact the quality, experience and satisfaction of
occupational performance. Engagement in occupation facilitates role participation and provides routine in daily living, thereby enhancing quality of life. The use of occupation to promote individual, community, and population health and wellness is the core of occupational therapy practice, education, research leadership and advocacy. (AOTA, 2011).

- **Occupational Therapy Process.** The occupational therapy process may be applied to individuals, programs, organizations, and other groups in the community. The process begins with an evaluation, in which a collaborative relationship is established between client and therapist (AOTA, 2008). The initial step, the occupational profile, yields information about the client’s occupational history and experiences, daily patterns, interests, values, needs, priorities, and concerns about participation in occupation. Analysis of occupational performance more specifically determines the client’s assets and what is hindering performance of occupation. Considerations include performance skills, patterns, context, activity demands, and client factors (AOTA, 2008). Steps of the intervention process include planning, implementation, and review of progress. Outcomes are defined by the client’s participation in life through engagement in occupation (AOTA, 2008) and may be achieved through various service-delivery models. Outcome information is utilized for future intervention planning and for program evaluation (AOTA, 2008).

Completion of the MOT program prepares a graduate to practice occupational therapy. Twenty-seven months are needed to complete a total of 91 semester hours of coursework on-campus at the Health Sciences Center at New Orleans, and off-campus at practice sites within and out of the state. Included in these semester hours are six months of Level II Fieldwork.

Courses progress in a sequence that first emphasizes an overview of occupation and occupational therapy. Next, students are given an individualistic yet holistic view of occupational performance across the lifespan, progressing to an expanded view of the person within the community. Basic science courses are introduced as students are developing an initial understanding of occupation, occupational performance, and the impact of disability on individuals and communities. Students then develop an understanding of the role of occupational therapy in enabling clients to engage in occupation in the context of their own lives.

The course sequencing of Fieldwork I and II experiences integrated throughout the curriculum provides a context for didactic learning in diverse practice contexts. Early exposure to practice in both traditional and emerging practice areas allows students to develop questions about practice and the opportunity to apply and challenge what they have learned in the classroom. This enables them to develop the clinical reasoning skills needed to engage in best practice in a variety of dynamic practice environments, leading into the study of applied scientific inquiry and evidenced-based decision-making, addressed in both research and practice application courses.
LSUHSC OCCUPATIONAL THERAPY’S SECOND LINE

The second line design clearly conveys the unique traditions and culture of New Orleans and the spirited quality that this culture adds to our program. The second line is a tradition in New Orleans that celebrates life, which relates to occupational therapy as a profession that promotes wellness in every aspect of life (McNulty, 2012). This reflects our program’s mission to promote health and wellness for all human beings, and our vision to maximize quality of life. On graduation, after 27 months in the curriculum, students will enjoy their own “second line”, as they celebrate their accomplishments and become practitioners that allow individuals to live fully and freely.

Incorporating the four important core concepts of the educational process, core values, course sequence, and content themes into the second line design requires qualities unique to an occupational therapist. In this design, the educational process is represented by the instruments because they produce quality music, just as the educational process will create quality occupational therapy practitioners. The course sequence is represented by the sequence of the musicians in a line. Just as the students must follow a specific sequence of courses, the musicians must follow each other in time in order to create rhythm and harmony. The content themes are represented by the leader of the second line because these themes are what lead our entire curriculum on a successful path. The core values are represented by the path taken or the street walked upon because this creates a strong foundation on which the second line will travel.

The second line is a dynamic concept, which is appropriate for our curriculum as changes and improvements are always being made. The open, energetic nature of a second line allows for any participants to join in at any time. This dynamic design allows for successful integration of fieldwork educators throughout the process, who will aid in the education of our students. There may be cracks in the sidewalk or bumps in the road that the musicians may stumble upon, just as students may encounter barriers throughout their education. Even though barriers arise, the second line continues onward, just as the student will continue through the program and overcome obstacles (Berg et al., 2008). We chose six musicians to represent the six practice areas of AOTA’s Centennial Vision, which include children and youth, health and wellness, mental health, productive aging, rehabilitation, disability, and participation, and work and industry (Clark, 2008). These six diverse members of the band represent the six diverse domains of occupational therapy, and the variety of clients that are helped by this profession.
Schematic Representation of Conceptual Model

Figure 1. Representation of Conceptual Model of the Curriculum
COURSE SEQUENCE

Spring I

OCCT 6410-Concepts in Occupation (4 Credits)
OCCT 6512- Occupational Performance Across the Lifespan (3 Credits)
OCCT 6624- Pathophysiology and Medical Conditions (6 Credits)
OCCT 6418- Interactive Reasoning (3 Credits)
Total: 16 Credits

Summer I

ANAT 6522: Human Anatomy (5 Credits)
OCCT 6524: Applied Kinesiology (3 Credits)
Total: 8 Credits

Fall I

OCCT 6450: Measurements and Evaluation (3 Credits)
OCCT 6528: OT for Neurological Conditions (3 Credits)
OCCT 6530: Applications I: General Practice Concepts (4 Credits)
ANAT 6533: Neuroanatomy (4 Credits)
OCCT 6540: Fieldwork Experience I & Seminar (1 Credit)
OCCT 6526: O.T. for Mental Health Conditions (3 Credits)
Total: 18 Credits

Spring II

OCCT 6432: Assistive Technology (3 Credits)
OCCT 6614: O.T. for Orthopedic Conditions (4 Credits)
OCCT 6620: O.T. for Geriatrics (4 Credits)
OCCT 6640: Documentation (3 Credits)
OCCT 6550: Research I (3 Credits)
Total: 17 Credits

Summer II

OCCT 6670: Fieldwork Experience IIa (6 Credits)
Total: 6 Credits

Fall II

OCCT 6716: Management in Occupational Therapy (3 Credits)
OCCT 6718: Community-Based & Specialized Practice (3 Credits)
OCCT 6720: Principles of Practice: Early Life (4 Credits)
OCCT 6730: Applications II: Specialized Practice Concepts (3 Credits)
OCCT 6750: Research II (3 Credits)
Total: 16 Credits
STUDENT OUTCOMES

1. Students will demonstrate an understanding of the basic tenets of occupational therapy. Students will:
   a. Explain the history and philosophical base of the profession.
   b. Articulate how occupation can promote health, well-being, quality of life, and prevent injury and disease.
   c. State the relationship between areas of occupation, performance skills, performance patterns, contexts, activity demands, and client factors.
   d. Articulate the effects of health and disability on an individual living in his/her context.
   e. Explain the differences and similarities between occupation, activity, and purposeful activity.
   f. Display behaviors indicative of reflective, empathetic, and ethical practitioners.
   g. Demonstrate cultural competence.

2. Students will demonstrate an understanding of the theoretical bases of occupational therapy. Students will:
   a. Develop a working knowledge of theories, models of practice and frames of reference used in occupational therapy.
   b. Apply theoretical constructs to practice.

3. Students will demonstrate an understanding of the process of screening and evaluation. Students will:
   a. Build a knowledge base of varied screening and evaluation methods.
   b. Select appropriate assessment tools based on their psychometric properties and on characteristics of person and context.
   c. Appropriately administer selected assessments and use occupation for assessment purposes.
   d. Interpret and apply evaluation findings appropriately.

4. Students will develop an understanding of the process of intervention. Students will:
   a. Develop and implement occupation-based intervention plans and strategies for various practice settings.
   b. Collaborate with clients, caregivers, and other professionals to create intervention plans.
   c. Demonstrate an ability to use a variety of teaching/learning techniques with clients, other health providers, and the public.
   d. Communicate and document effectively through written, verbal, and nonverbal
means.
e. Exhibit the ability to appropriately adapt occupations and the environment.
f. Know when to refer clients to other health professionals within and outside of the profession.
g. Demonstrate accountability for reimbursement of services.
h. Possess individual and group interaction skills for use with clients, other health care providers, and the public.
i. Monitor, reassess, and modify interventions as needs of client changes.
j. Discharge clients using appropriate procedures.

5. Students will demonstrate an understanding of various contexts in which occupational therapy services are provided. Students will:
   a. Identify policy issues related to systems in which occupational therapy may be found.
   b. Understand models of service delivery of occupational therapy and systems that interface with occupational therapy, i.e., health care, education, community systems.
   c. Appreciate the need to stay abreast of changes in the various service delivery systems.

6. Students will apply principles of management and systems to the provision of occupational therapy services. Students will:
   a. Understand implications of State and Federal legislation in the delivery of occupational therapy services and credentialing of occupational therapy personnel.
   b. Demonstrate an understanding of reimbursement policies and procedures and their effects on service clients.
   c. Exhibit professional work behaviors, i.e., proper maintenance of practice environments, time management, respectful treatment of others.
   d. Understand the supervisory process of occupational therapy and non-occupational therapy personnel.
   e. Acknowledge the ongoing professional responsibility for providing fieldwork education and supervision.
   f. Develop and evaluate programs.
   g. Explain fundamental marketing principles.

7. Students will understand the importance of working collaboratively with other occupational therapy personnel, and other service providers. The students will:
   a. Recognize the role of the occupational therapy assistants in gathering data implementing interventions.
   b. Demonstrate the ability to work collaboratively with clients, their caregivers, and other service providers.

8. Students will develop an ability to understand and apply research findings to practice. Students will:
   a. Articulate the importance of research for practice and the continued development of the profession.
   b. Appropriately use professional literature to make practice decisions; display evidence-based practice skills.
c. Participate in basic research studies.
d. Develop a basic understanding of the process of securing grants.

9. Students will understand and appreciate the ethics and values of the profession. Students will:
   a. Demonstrate knowledge of the Occupational Therapy Code of Ethics (AOTA, 2015a) and the Standards of Practice for Occupational Therapy (AOTA, 2015b).
   b. Explain the functions of local, state, and national occupational therapy associations.
   c. Promote occupational therapy.
   d. Acknowledge the need to maintain professional competence through life-long learning.
   e. Identify the varied roles of the occupational therapist
References

Revised Reference List 4/16
The rapidly changing and dynamic nature of contemporary health and human services delivery systems provides challenging opportunities for the occupational therapist to use knowledge and skills in a practice area as a direct care provider, consultant, educator, manager, leader, researcher, and advocate for the profession and the consumer.

A graduate from an ACOTE-accredited doctoral-degree-level occupational therapy program must:

1. Have acquired, as a foundation for professional study, a breadth and depth of knowledge in the liberal arts and sciences and an understanding of issues related to diversity.
2. Be educated as a generalist with a broad exposure to the delivery models and systems used in settings where occupational therapy is currently practiced and where it is emerging as a service.
3. Have achieved entry-level competence through a combination of academic and fieldwork education.
4. Be prepared to articulate and apply occupational therapy theory and evidence-based evaluations and interventions to achieve expected outcomes as related to occupation.
5. Be prepared to articulate and apply therapeutic use of occupations with individuals or groups for the purpose of participation in roles and situations in home, school, workplace, community, and other settings.
6. Be able to plan and apply occupational therapy interventions to address the physical, cognitive, psychosocial, sensory, and other aspects of performance in a variety of contexts and environments to support engagement in everyday situations in home, school, workplace, community, and other settings.

The rapidly changing and dynamic nature of contemporary health and human services delivery systems requires the occupational therapist to possess basic skills as a direct care provider, consultant, educator, manager, researcher, and advocate for the profession and the consumer.

A graduate from an ACOTE-accredited master’s-degree-level occupational therapy program must:

1. Have acquired, as a foundation for professional study, a breadth and depth of knowledge in the liberal arts and sciences and an understanding of issues related to diversity.
2. Be educated as a generalist with a broad exposure to the delivery models and systems used in settings where occupational therapy is currently practiced and where it is emerging as a service.
3. Have achieved entry-level competence through a combination of academic and fieldwork education.
4. Be prepared to articulate and apply occupational therapy theory and evidence-based evaluations and interventions to achieve expected outcomes as related to occupation.
5. Be prepared to articulate and apply therapeutic use of occupations with individuals or groups for the purpose of participation in roles and situations in home, school, workplace, community, and other settings.
6. Be able to plan and apply occupational therapy interventions to address the physical, cognitive, psychosocial, sensory, and other aspects of performance in a variety of contexts and environments to support engagement in everyday situations in home, school, workplace, community, and other settings.

The rapidly changing and dynamic nature of contemporary health and human services delivery systems requires the occupational therapy assistant to possess basic skills as a direct care provider, educator, and advocate for the profession and the consumer.

A graduate from an ACOTE-accredited associate-degree-level occupational therapy assistant program must:

1. Have acquired an educational foundation in the liberal arts and sciences, including a focus on issues related to diversity.
2. Be educated as a generalist with a broad exposure to the delivery models and systems used in settings where occupational therapy is currently practiced and where it is emerging as a service.
3. Have achieved entry-level competence through a combination of academic and fieldwork education.
4. Be prepared to articulate and apply occupational therapy principles and intervention tools to achieve expected outcomes as related to occupation.
5. Be prepared to articulate and apply therapeutic use of occupations with individuals or groups for the purpose of participation in roles and situations in home, school, workplace, community, and other settings.
6. Be able to apply occupational therapy interventions to address the physical, cognitive, psychosocial, sensory, and other aspects of performance in a variety of contexts and environments to support engagement in everyday situations in home, school, workplace, community, and other settings.

**A.5.0. STRATEGIC PLAN AND PROGRAM ASSESSMENT**

For programs that are offered at more than one location, the program’s strategic plan, evaluation plan, and results of ongoing evaluation must address each program location as a component of the overall plan.

| A.5.1.          | The program must document a current strategic plan that articulates the program’s future vision and guides the program development (e.g., faculty recruitment and professional growth, scholarship, changes in the curriculum design, priorities in academic resources, procurement of fieldwork and experiential component sites). A program strategic plan must be for a minimum of a 3-year period and include, but need not be limited to:  
Evidence that the plan is based on program evaluation and an analysis of external and internal environments.  
Long-term goals that address the vision and mission of both the institution and the program, as well as specific needs of the program.  
Specific measurable action steps with expected timelines by which the program will reach its long-term goals.  
Person(s) responsible for action steps.  
Evidence of periodic updating of action steps and long-term goals as they are met or as circumstances change. | The program must document a current strategic plan that articulates the program’s future vision and guides the program development (e.g., faculty recruitment and professional growth, scholarship, changes in the curriculum design, priorities in academic resources, procurement of fieldwork and experiential component sites). Intervention plans and strategies must be culturally relevant, reflective of current occupational therapy practice, and based on available evidence. Interventions address the following components:  
- The occupational profile, including participation in activities that are meaningful and necessary for the client to carry out roles in home, work, and community environments.  
- Client factors, including values, beliefs, spirituality, body functions (e.g., neuromuscular, sensory and pain, visual, perceptual, cognitive, mental) and body structures (e.g., cardiovascular, digestive, nervous, integumentary systems).  
- Performance patterns (e.g., habits, routines, rituals, roles).  
- Context (e.g., cultural, personal, temporal, virtual) and environment (e.g., physical, social).  
- Performance skills, including motor and praxis skills, sensory–perceptual skills, emotional communication and social skills. | INTERVENTION AND IMPLEMENTATION  
The process of intervention to facilitate occupational performance and participation must be done under the supervision of and in cooperation with the occupational therapist and must be culturally relevant, reflective of current occupational therapy practice, and based on available evidence. The program must facilitate development of the performance criteria listed below. The student will be able to assist with the development of occupation-based intervention plans and strategies (including goals and methods to achieve them) on the basis of the stated needs of the client as well as data gathered during the evaluation process in collaboration with the client and others. Intervention plans and strategies must be culturally relevant, reflective of current occupational therapy practice, and based on available evidence. Interventions address the following components:  
- The occupational profile, including participation in activities that are meaningful and necessary for the client to carry out roles in home, work, and community environments.  
- Client factors, including values, beliefs, spirituality, body functions (e.g., neuromuscular, sensory and pain, visual, perceptual, cognitive, mental) and body structures (e.g., cardiovascular, digestive, nervous, integumentary systems).  
- Performance patterns (e.g., habits, routines, rituals, roles).  
- Context (e.g., cultural, personal, temporal, virtual) and environment (e.g., physical, social).  
- Performance skills, including motor and praxis skills, sensory–perceptual skills, emotional communication and social skills. |

**B.9.0. PROFESSIONAL ETHICS, VALUES, AND RESPONSIBILITIES**

Professional ethics, values, and responsibilities include an understanding and appreciation of ethics and values of the profession of occupational therapy. The program must facilitate development of the performance criteria listed below. The student will be able to:

<p>| B.9.1. | Demonstrate knowledge and understanding of the American Occupational Therapy Association (AOTA) Occupational Therapy Code of Ethics and Ethics Standards and AOTA Standards of Practice and use them as a guide for ethical decision making in professional interactions, client interventions, and employment settings. | Demonstrate knowledge and understanding of the American Occupational Therapy Association (AOTA) Occupational Therapy Code of Ethics and Ethics Standards and AOTA Standards of Practice and use them as a guide for ethical decision making in professional interactions, client interventions, and employment settings. | Demonstrate knowledge and understanding of the American Occupational Therapy Association (AOTA) Occupational Therapy Code of Ethics and Ethics Standards and AOTA Standards of Practice and use them as a guide for ethical decision making in professional interactions, client interventions, and employment settings. |
| B.9.2. | Discuss and justify how the role of a professional is enhanced by knowledge of and involvement in international, national, state, and local occupational therapy associations and related professional associations. | Discuss and justify how the role of a professional is enhanced by knowledge of and involvement in international, national, state, and local occupational therapy associations and related professional associations. | Explain and give examples of how the role of a professional is enhanced by knowledge of and involvement in international, national, state, and local occupational therapy associations and related professional associations. |</p>

## SECTION C: FIELDWORK EDUCATION AND DOCTORAL EXPERIENTIAL COMPONENT

**C.1.0: FIELDWORK EDUCATION**

Fieldwork education is a crucial part of professional preparation and is best integrated as a component of the curriculum design. Fieldwork experiences should be implemented and evaluated for their effectiveness by the educational institution. The experience should provide the student with the opportunity to carry out professional responsibilities under supervision of a qualified occupational therapy practitioner serving as a role model. The academic fieldwork coordinator is responsible for the program's compliance with fieldwork education requirements. The academic fieldwork coordinator will

Definitions given below are for the purposes of these documents.

ABILITY TO BENEFIT: A phrase that refers to a student who does not have a high school diploma or its recognized equivalent, but is eligible to receive funds under the Title IV Higher Education Act programs after taking an independently administered examination and achieving a score, specified by the Secretary of the U.S. Department of Education (USDE), indicating that the student has the ability to benefit from the education being offered.

ACADEMIC CALENDAR: The official institutional document that lists registration dates, semester/quarter stop and start dates, holidays, graduation dates, and other pertinent events. Generally, the academic year is divided into two major semesters, each approximately 14 to 16 weeks long. A smaller number of institutions have quarters rather than semesters. Quarters are approximately 10 weeks long; there are three major quarters and the summer session.

ACTIVITY: A term that describes a class of human actions that are goal directed (AOTA, 2008b).

ADVANCED: The stage of being beyond the elementary or introductory.

AFFILIATE: An entity that formally cooperates with a sponsoring institution in implementing the occupational therapy educational program.

AREAS OF OCCUPATION: Activities in which people engage: activities of daily living, instrumental activities of daily living, rest and sleep, education, work, play, leisure, and social participation.

ASSIST: To aid, help, or hold an auxiliary position.

BODY FUNCTIONS: The physiological functions of body systems (including psychological functions).

BODY STRUCTURES: Anatomical parts of the body such as organs, limbs, and their components.

CARE COORDINATION: The process that links clients with appropriate services and resources.

CASE MANAGEMENT: A system to ensure that individuals receive appropriate health care services.

CLIENT: The term used to name the entity that receives occupational therapy services. Clients may include (1) individuals and other persons relevant to the client’s life including family, caregivers, teachers, employers, and others who may also help or be served indirectly; (2) organizations, such as businesses, industries, or agencies; and (3) populations within a community (AOTA, 2008b).

CLIENT-CENTERED SERVICE DELIVERY: An orientation that honors the desires and priorities of clients in designing and implementing interventions.

CLIENT FACTORS: Factors that reside within the client and that may affect performance in areas of occupation. Client factors include body functions and body structures.

CLINICAL REASONING: Complex multifaceted cognitive process used by practitioners to plan, direct, perform, and reflect on intervention.

COLLABORATE: To work together with a mutual sharing of thoughts and ideas.

COMPETENT: To have the requisite abilities/qualities and capacity to function in a professional environment.

CONSORTIUM: Two or more higher education institutions having a formal agreement to share resources for the operation of an educational program.
CONSUMER: The direct and/or indirect recipient of educational and/or practitioner services offered.

CONTEXT/CONTEXTUAL FACTORS AND ENVIRONMENT:

CONTEXT: The variety of interrelated conditions within and surrounding the client that influence performance. Contexts include cultural, personal, temporal, and virtual aspects.

ENVIRONMENT: The external physical and social environment that surrounds the client and in which the client's daily life occupations occur.

CONTEXT OF SERVICE DELIVERY: The knowledge and understanding of the various contexts in which occupational therapy services are provided.

COOPERATIVE PROGRAM: Two administrative entities having a cooperative agreement to offer a single program. At least one of the entities must hold degree-granting authority as required by the ACOTE Standards.

CRITERION-REFERENCED: Tests that compare the performance of an individual to that of another group, known as the norm group.

CULMINATING PROJECT: A project that is completed by a doctoral student that demonstrates the student's ability to relate theory to practice and to synthesize advanced knowledge in a practice area.

CURRICULUM DESIGN: An overarching set of assumptions that explains how the curriculum is planned, implemented, and evaluated. Typically, a curriculum design includes educational goals and curriculum threads and provides a clear rationale for the selection of content, the determination of scope of content, and the sequence of the content. A curriculum design is expected to be consistent with the mission and philosophy of the sponsoring institution and the program.

CURRICULUM THREADS: Curriculum threads, or themes, are identified by the program as areas of study and development that follow a path through the curriculum and represent the unique qualities of the program, as demonstrated by the program's graduates. Curriculum threads are typically based on the profession's and program's vision, mission, and philosophy (e.g., occupational needs of society, critical thinking/professional reasoning, diversity/globalization. (AOTA, 2008a).

DIAGNOSIS: The process of analyzing the cause or nature of a condition, situation, or problem. Diagnosis as stated in Standard B.4.0. refers to the occupational therapist's ability to analyze a problem associated with occupational performance and participation.

DISTANCE EDUCATION: Education that uses one or more of the technologies listed below to deliver instruction to students who are separated from the instructor and to support regular and substantive interaction between the students and the instructor, either synchronously or asynchronously. The technologies may include

- The Internet;
- One-way and two-way transmissions through open broadcast, closed circuit, cable, microwave, broadband lines, fiber optics, satellite, or wireless communications devices;
- Audio conferencing; or
- Video cassettes, DVDs, and CD-ROMs, if the cassettes, DVDs, or CD-ROMs are used in a course.

DISTANCE EDUCATION DELIVERY MODEL: There is one curriculum with some (or all) of the students receiving the didactic portion of the program taught via distance education from the primary campus. The didactic portion of the program is delivered to all students (irrespective of whether it is delivered in class or by distance education) by the same instructors. Students may receive the experiential and lab components at either the primary campus or at other locations.

DRIVER REHABILITATION: Specialized evaluation and training to develop mastery of specific skills and techniques to effectively drive a motor vehicle independently and in accordance with state department of motor vehicles regulations.

ENTRY-LEVEL OCCUPATIONAL THERAPIST: The outcome of the occupational therapy educational and certification process; an individual prepared to begin generalist practice as an occupational therapist with less than 1 year of experience.

ENTRY-LEVEL OCCUPATIONAL THERAPY ASSISTANT: The outcome of the occupational therapy educational and certification process; an individual prepared to begin generalist practice as an occupational therapy assistant with less than 1 year of experience.
FACULTY:

**FACULTY, CORE:** Persons who are resident faculty, including the program director, appointed to and employed primarily in the occupational therapy educational program.

**FACULTY, FULL TIME:** Core faculty members who hold an appointment that are full-time, as defined by the institution, and whose job responsibilities include teaching and/or contributing to the delivery of the designed curriculum regardless of the position title (e.g., full-time instructional staff and clinical instructors would be considered faculty).

**FACULTY, PART TIME:** Core faculty members who hold an appointment that is considered by that institution to constitute less than full-time service and whose job responsibilities include teaching and/or contributing to the delivery of the designed curriculum regardless of the position title.

**FACULTY, ADJUNCT:** Persons who are responsible for teaching at least 50% of a course and are part-time, nonsalaried, non-tenure-track faculty members who are paid for each class they teach.

**FIELDWORK COORDINATOR:** Faculty member who is responsible for the development, implementation, management, and evaluation of fieldwork education.

**FRAME OF REFERENCE:** A set of interrelated, internally consistent concepts, definitions, postulates, and principles that provide a systematic description of a practitioner’s interaction with clients. A frame of reference is intended to link theory to practice.

**FULL-TIME EQUIVALENT (FTE):** An equivalent position for a full-time faculty member (as defined by the institution). A full-time equivalent can be made up of no more than 3 individuals.

**GRADUATION RATE:** The total number of students who graduated from a program within 150% of the published length of the program, divided by the number of students on the roster who started in the program.

**HABITS:** “Automatic behavior that is integrated into more complex patterns that enable people to function on a day-to-day basis” (Neidstadt & Crepeau, 1998).

**HEALTH LITERACY:** Degree to which individuals have the capacity to obtain, process, and understand basic health information and services needed to make appropriate health decisions (National Network of Libraries of Medicine, 2011).

**INTERPROFESSIONAL COLLABORATIVE PRACTICE:** “Multiple health workers from different professional backgrounds working together with patients, families, careers, and communities to deliver the highest quality of care” (World Health Organization, 2010).

**MEMORANDUM OF UNDERSTANDING (MOU):** A document outlining the terms and details of an agreement between parties, including each parties’ requirements and responsibilities. A memorandum of understanding may be signed by any individual who is authorized by the institution to sign fieldwork memoranda of understanding on behalf of the institution.

**MENTORING:** A relationship between two people in which one person (the mentor) is dedicated to the personal and professional growth of the other (the mentee). A mentor has more experience and knowledge than the mentee.

**MISSION:** A statement that explains the unique nature of a program or institution and how it helps fulfill or advance the goals of the sponsoring institution, including religious missions.

**MODALITIES:** Application of a therapeutic agent, usually a physical agent modality.

- **DEEP THERMAL MODALITIES:** Modalities such as therapeutic ultrasound and phonophoresis.

- **ELECTROTHERAPEUTIC MODALITIES:** Modalities such as biofeedback, neuromuscular electrical stimulation, functional electrical stimulation, transcutaneous electrical nerve stimulation, electrical stimulations for tissue repair, high-voltage galvanic stimulation, and iontophoresis.

- **MECHANICAL MODALITIES:** Modalities such as vasopneumatic devices and continuous passive motion.
SUPERFICIAL THERMAL MODALITIES: Modalities such as hydrotherapy, whirlpool, cryotherapy, fluidotherapy, hot packs, paraffin, water, and infrared.

MODEL OF PRACTICE: The set of theories and philosophies that defines the views, beliefs, assumptions, values, and domain of concern of a particular profession or discipline. Models of practice delimit the boundaries of a profession.

OCCUPATION: “Activities . . . of everyday life, named, organized and given value and meaning by individuals and a culture. Occupation is everything that people do to occupy themselves, including looking after themselves . . . enjoying life . . . and contributing to the social and economic fabric of their communities” (Law, Polatajko, Baptiste, & Townsend, 1997).

OCCUPATIONAL PROFILE: An analysis of a client’s occupational history, routines, interests, values, and needs to engage in occupations and occupational roles.

OCCUPATIONAL THERAPY: The art and science of applying occupation as a means to effect positive, measurable change in the health status and functional outcomes of a client by a qualified occupational therapist and/or occupational therapy assistant (as appropriate).

OCCUPATIONAL THERAPY PRACTITIONER: An individual who is initially credentialed as an occupational therapist or an occupational therapy assistant.

PARTICIPATION: Active engagement in occupations.

PERFORMANCE PATTERNS: Patterns of behavior related to daily life activities that are habitual or routine. Performance patterns include habits, routines, rituals, and roles.

PERFORMANCE SKILLS: Features of what one does, not what one has, related to observable elements of action that have implicit functional purposes. Performance skills include motor and praxis, sensory/perceptual, emotional regulation, cognitive, and communication and social skills.

PHILOSOPHY: The underlying belief and value structure for a program that is consistent with the sponsoring institution and which permeates the curriculum and the teaching learning process.

POPULATION-BASED INTERVENTIONS: Interventions focused on promoting the overall health status of the community by preventing disease, injury, disability, and premature death. A population-based health intervention can include assessment of the community’s needs, health promotion and public education, disease and disability prevention, monitoring of services, and media interventions. Most interventions are tailored to reach a subset of a population, although some may be targeted toward the population at large. Populations and subsets may be defined by geography, culture, race and ethnicity, socioeconomic status, age, or other characteristics. Many of these characteristics relate to the health of the described population (Keller, Schaffer, Lia-Hoagberg, & Strohschein, 2002).

PREPARATORY METHODS: Intervention techniques focused on client factors to help a client’s function in specific activities.

PROGRAM DIRECTOR (associate-degree-level occupational therapy assistant): An initially certified occupational therapist or occupational therapy assistant who is licensed or credentialed according to regulations in the state or jurisdiction in which the program is located. The program director must hold a minimum of a master’s degree.

PROGRAM DIRECTOR (master’s-degree-level occupational therapist): An initially certified occupational therapist who is licensed or credentialed according to regulations in the state or jurisdiction in which the program is located. The program director must hold a doctoral degree.

PROGRAM DIRECTOR (doctoral-degree-level occupational therapist): An initially certified occupational therapist who is licensed or credentialed according to regulations in the state or jurisdiction in which the program is located. The program director must hold a doctoral degree.

PROGRAM EVALUATION: A continuing system for routinely and systematically analyzing data to determine the extent to which the program is meeting its stated goals and objectives.

PURPOSEFUL ACTIVITY: “An activity used in treatment that is goal directed and that the [client] sees as meaningful or purposeful” (Low, 2002).

RECOGNIZED REGIONAL OR NATIONAL ACCREDITING AUTHORITY: Regional and national accrediting agencies recognized by the USDE and/or the Council for Higher Education Accreditation (CHEA) to accredit postsecondary educational programs/institutions. The purpose of recognition is to ensure that the accrediting agencies are reliable authorities for evaluating quality education or training programs in the institutions they accredit.
Regional accrediting bodies recognized by USDE:
- Accrediting Commission for Community and Junior Colleges, Western Association of Schools and Colleges (ACCJC/WASC)
- Accrediting Commission for Senior Colleges and Universities, Western Association of Schools and Colleges (ACSCU/WASC)
- Commission on Colleges, Southern Association of Colleges and Schools (SACS)
- Commission on Institutions of Higher Education, New England Association of Schools and Colleges (CIHE/NEASC)
- Higher Learning Commission, North Central Association of Colleges and Schools (HLC)
- Middle States Commission on Higher Education, Middle States Association of Colleges and Schools (MSCHE)
- Northwest Commission on Colleges and Universities (NWCCU)

National accrediting bodies recognized by USDE:
- Accrediting Bureau of Health Education Schools (ABHES)
- Accrediting Commission of Career Schools and Colleges (ACCSC)
- Accrediting Council for Continuing Education and Training (ACCET)
- Accrediting Council for Independent Colleges and Schools (ACICS)
- Council on Occupational Education (COE)
- Distance Education and Training Council Accrediting Commission (DETC)
- New York State Board of Regents

REFLECTIVE PRACTICE: Thoughtful consideration of one’s experiences and knowledge when applying such knowledge to practice. Reflective practice includes being coached by professionals.

RELEASE TIME: Period when a person is freed from regular duties, especially teaching, to allow time for other tasks or activities.

RETENTION RATE: A measure of the rate at which students persist in their educational program, calculated as the percentage of students on the roster, after the add period, from the beginning of the previous academic year who are again enrolled at, or graduated prior to, the beginning of the subsequent academic year.

SCHOLARSHIP: “A systematic investigation . . . designed to develop or to contribute to generalizable knowledge” (45 CFR § 46). Scholarship is made public, subject to review, and part of the discipline or professional knowledge base (Glassick, Huber, & Maeroff, 1997). It allows others to build on it and further advance the field (AOTA, 2009).

SCHOLARSHIP OF DISCOVERY: Engagement in activity that leads to the development of “knowledge for its own sake.” The Scholarship of Discovery encompasses original research that contributes to expanding the knowledge base of a discipline (Boyer, 1990).

SCHOLARSHIP OF INTEGRATION: Investigations making creative connections both within and across disciplines to integrate, synthesize, interpret, and create new perspectives and theories (Boyer, 1990).

SCHOLARSHIP OF APPLICATION: Practitioners apply the knowledge generated by Scholarship of Discovery or Integration to address real problems at all levels of society (Boyer, 1990). In occupational therapy, an example would be the application of theoretical knowledge to practice interventions or to teaching in the classroom.

SCHOLARSHIP OF TEACHING AND LEARNING: “Involves the systematic study of teaching and/or learning and the public sharing and review of such work through presentations, publications, and performances” (McKinney, 2007, p. 10).

SKILL: The ability to use one’s knowledge effectively and readily in execution or performance.

SPONSORING INSTITUTION: The identified legal entity that assumes total responsibility for meeting the minimal standards for ACOTE accreditation.

STRATEGIC PLAN: A comprehensive plan that articulates the program’s future vision and guides the program development (e.g., faculty recruitment and professional growth, changes in the curriculum design, priorities in academic resources, procurement of fieldwork sites). A program’s strategic plan must include, but need not be limited to,
- Evidence that the plan is based on program evaluation and an analysis of external and internal environments,
- Long-term goals that address the vision and mission of both the institution and program, as well as specific needs of the program,
- Specific measurable action steps with expected timelines by which the program will reach its long-term goals,
- Person(s) responsible for action steps, and
- Evidence of periodic updating of action steps and long-term goals as they are met or as circumstances change.

**SUPERVISE:** To direct and inspect the performance of workers or work.

**SUPERVISION, DIRECT:** Supervision that occurs in real time and offers both audio and visual capabilities to ensure opportunities for timely feedback.

**SUPERVISOR:** One who ensures that tasks assigned to others are performed correctly and efficiently.

**THEORY:** A set of interrelated concepts used to describe, explain, or predict phenomena.

**TRANSFER OF CREDIT:** A term used in higher education to award a student credit for courses earned in another institution prior to admission to the occupational therapy or occupational therapy assistant program.

Technical Standards for Occupational Therapy

The school is committed to enabling student with disabilities to complete the course of study of our program by means of reasonable accommodations consistent with the Americans with Disabilities Act (ADA). These technical standards articulate the expectations and requisite abilities considered essential for occupational therapy students to become primary providers of occupational therapy services. All students admitted into this program should be able to demonstrate these abilities at the time of admission and at all times during matriculation. If accommodations are needed by a student to perform the technical standards, he or she must notify the Associate Dean for Academic Affairs at (504)568-4244 after being accepted into the program.

The major function of an Occupational Therapist (OTR) with registered certification is to provide occupational therapy services including evaluation, intervention planning, implementation, and review; discharge planning; outcomes assessment; and related documentation and communication.

The following technical standards describe the essential eligibility requirements for participation and progression in the occupational therapy curriculum. Standards cover observation skills, behavioral and social skills, communication, psychomotor skills, and cognitive skills. It is the expectation of the Department of Occupational Therapy that students engage at all times in client-centered, occupation-based services in a safe, professional and compassionate manner. These skills are necessary for successful transition into the clinical world of the occupational therapist.

Observation Skills

1. Students must be able to achieve the required competencies in the classroom setting from a variety of educational experiences in both basic arts and sciences and clinical settings.

2. Individuals must accurately observe human performance, discriminating between a safe and an unsafe environment and between therapeutic and non-therapeutic behavior and contexts.

3. Individuals must perceive, assimilate, and integrate information.

4. Individuals must demonstrate adequate functional use of visual, tactile, auditory, and other sensory and perceptual modalities to enable such observations and information acquisition.

Communication Skills

1. Effective communication is critical for students to build relationships with faculty, fellow graduate students, coworkers, clients, and their significant others in the student's various roles of learner, colleague, consultant, and leader.

2. Individuals must be able to gather, comprehend, utilize, and disseminate information effectively, efficiently, and according to professional standards.

3. Communication should be comprehensible by patients, professionals, and laypersons.
4. Individuals must be able to communicate effectively and sensitively with patients and colleagues, including individuals from different cultural and social backgrounds; this includes, but is not limited to, the ability to establish rapport and communicate with others.

5. Individuals must demonstrate the ability to observe, recognize and understand non-verbal behavior.

6. Individuals must participate in group and face-to-face discussions/presentations in a clear, organized, and professional manner.

**Intellectual/Conceptual Skills**

1. Students must demonstrate critical thinking skills so that they can problem-solve creatively, master abstract ideas, and synthesize information presented in academic, clinical and fieldwork settings.

2. Individuals must be able to measure, calculate, reason, analyze, process, integrate, synthesize, apply and retain facts, concepts, and data.

3. Individuals must develop and exhibit a sense of Professional ethics, and also recognize and apply pertinent legal and ethical standards.

4. Individuals must be able to combine separate pieces of information or specific answers to problems to come up with logical explanations for why seemingly unrelated events occur or are utilized together.

5. Individuals must use ingenuity and imagination in solving novel, ill-defined problems in complex, real-world settings.

**Psychomotor**

1. Students must possess the motor functions needed to manipulate tools or handle clients in a variety of settings, under a variety of conditions.

2. Individuals must demonstrate the physical strength and coordination to safely handle and move clients; perform medical procedures, or direct clients in various practice settings according to the needs of their discipline.

3. Individuals must perform physical activities that require considerable use of arms and legs and moving one’s whole body, such as climbing, lifting, getting up and down from the floor, balancing, walking, bending, stooping and handling of material and people. Standing and sitting for long periods of time are also necessary. This includes being able to apply physical restraints, and to lift, push and pull at least 50 pounds for routine transfers from varying surfaces, and be able to manually adjust equipment found in the occupational therapy clinical setting.

4. Individuals must possess adequate fine motor skills to be able to manipulate small objects, manage scissors, fabricate splints, and utilize tools /activities.

5. Individuals must tolerate being in close physical proximity and in physical contact with others.

**Behavioral & Social Skills**

1. Students must demonstrate emotional stability and acceptable communication skills, and be capable of developing mature and effective interpersonal relationships with other students, health care workers, clients and their significant others that inspire trust and respect and exceptional therapeutic use of self.

2. Individuals must be able to tolerate the physical, mental, and emotional academic and clinical workloads and to function effectively under stress.
3. Individuals will be able to adapt to changing environments, display flexibility, and function in the face of the uncertainties inherent in the clinical and academic setting.

4. Individuals must demonstrate the ability to self-reflect and understand why they respond/think/feel in the way that they do and then self-correct, if necessary. Openness and responsive to feedback is considered essential for success.

5. Individuals will safely perceive and navigate varied environments and communities.

6. Individuals must exhibit the ability and commitment to work collaboratively and professionally with individuals and groups in an intense setting to meet the needs of people of diverse cultures, age groups, socioeconomic groups and challenges without bias and in a harmonious manner.

7. Individuals must support and promote the activities of peers and health care professionals by sharing knowledge, eliciting input, and acting with empathy toward others.

8. Individuals must demonstrate compassion; integrity, concern for others, interpersonal skills; interest and motivation are all personal qualities that are critical.

**Professional Responsibilities**

1. Students must exhibit the ability to meet the challenges of any academic, medical or clinical situation that requires a readiness for immediate and appropriate response without interference of personal or medical problems.

2. Students have the responsibility to attend and be able to travel to and from classes and clinical assignments on time, and possess the organizational skills and stamina for performing required tasks and assignments within allotted time frames.

3. Individuals must have the ability to perform problem-solving tasks in a timely manner and prioritize and organize multiple workload needs, completing required work within the specified due dates.

4. Students will take initiative to direct their own learning as evidenced by the ability to prepare in advance, utilize resources before asking for help and independently explore additional information. Students must be able to take responsibility for their actions and outcomes.

5. Students need to work cooperatively and collaboratively with other students on assigned projects, and participate willingly in a supervisory process involving evaluation of other students and their own abilities and reasoning skills via giving and receiving feedback, as well as looking for ways to improve.

6. Students must adhere to policies of the university, their program, and clinical sites. This includes matters ranging from professional dress and behavior, to attending to their program’s academic schedule.

7. Students must demonstrate knowledge of and commitment to the code of ethics of their profession and behavior that reflects a sense of right and wrong in the helping environment.

*Detach and returned bottom portion with Acceptance Form*
Acknowledgement of Technical Standards

I understand that as a student in the Master of Occupational Therapy Program at Louisiana State University Health Sciences Center, I will be expected to participate in activities that will prepare me to perform all of the technical standards required of an occupational therapist as listed in the LSUHSC-NO Technical Standards for Occupational Therapy.

Graduate Professional Scholastic Requirements

1. A minimum cumulative GPA of 3.0 is required for graduation.
2. The minimum scholastic requirement for course work is a grade of C. However, no more than 6 credit hours of C grades may be counted toward a degree unless otherwise established by the department. In courses designed Pass/Fail or Satisfactory/Unsatisfactory, a grade of Pass or Satisfactory is required.

Provisions for Academic Progression
1. If an unacceptable grade is recorded in a non-prerequisite course, the student must satisfactorily complete the course when next regularly offered.
2. If an unacceptable grade is recorded in a course designated as a prerequisite course, the student will receive a warning to the effect that he/she must satisfactorily complete the prerequisite course before continuing the program sequence.
3. Students may not participate in clinical fieldwork or preceptorship courses until all prerequisite course work has been completed successfully.
4. Student who earns a grade of Unsatisfactory or Failing a clinical fieldwork or preceptorship course will be placed on scholastic probation.
5. Students who fall from 1-10 quality points below a 3.0 cumulative GPA will be placed on scholastic probation.
6. Students placed on scholastic probation must repeat those courses in which an unacceptable grade was earned when next regularly offered and earn a satisfactory grade. Students will remain on scholastic probation until this requirement is met and the minimum scholastic requirement for cumulative GPA is achieved. Failure to meet this requirement will result in dismissal from the School.
7. A course, including those designated clinical fieldwork and preceptorship, may be repeated one time only. Students who repeat a course but earn an unacceptable grade will be dismissed from the school.
8. Students who fall more than 10 quality points below a 3.0 cumulative GPA will be dismissed from the School.
9. Students on scholastic probation are not eligible for graduation.
10. Students must complete the program in a specified period of time. (Time frame to be determined by each department).
11. Grades recorded in repeated course work do not replace the original grade. Both the original grade and repeated grade will appear on the academic transcript and both grades will be used in the composition of the academic grade point average.
12. Students dismissed from the School for academic reasons must reapply to the program to be considered for readmission.
Department of Occupational Therapy

MASTER OF OCCUPATIONAL THERAPY (MOT):  
Scholastic Requirements

1. A minimum cumulative GPA of 3.0 is required for graduation.

2. The minimum scholastic requirement for course work is a grade of C. However, no more than 13 credit hours of C grades may be counted towards the LSUHSC Master of Occupational Therapy degree. Students receiving greater than 13 credits of C may be dismissed from the program.

3. In courses designed Pass/Fail or Satisfactory/Unsatisfactory, a grade of Pass or Satisfactory is required.

Provisions for Academic Progression

1. All courses in one semester are prerequisite to courses in successive semesters, with the exception of OCCT 6670 Fieldwork Experience IIa. If an unacceptable grade is recorded in a course designated as a prerequisite course, the student will receive a notice to the effect that he/she must satisfactorily complete the prerequisite course before continuing the program sequence.

2. Students may not participate in clinical fieldwork until all prerequisite course work for that fieldwork has been completed successfully.

3. Student who earns a grade of Unsatisfactory or Failing a clinical fieldwork will be placed on scholastic probation, and must repeat the fieldwork.

4. Students who fall from 1-10 quality points below a 3.0 cumulative GPA will be placed on scholastic probation.

5. Students placed on scholastic probation must repeat those courses in which an unacceptable grade was earned when next regularly offered and earn a satisfactory grade. Students will remain on scholastic probation until this requirement is met and the minimum scholastic requirement for cumulative GPA is achieved. Failure to meet this requirement will result in dismissal from the School.

6. A course, including those designated clinical fieldwork (OCCT 6670 and OCCT 6770), may be repeated one time only. Students who repeat a course but earn an unacceptable grade will be dismissed from the school.

7. Students who fall more than 10 quality points below a 3.0 cumulative GPA will be dismissed from the School.

8. Students on scholastic probation are not eligible for graduation.
9. Students must complete the program within 42 months. Extensions may be granted by the Department Chair for good cause. All Level II Fieldwork must be completed within 24 months following completion of didactic course work. Extensions may be granted by the Department Chair for good cause.

10. Grades recorded in repeated course work do not replace the original grade. Both the original grade and repeated grade will appear on the academic transcript and both grades will be used in the composition of the academic grade point average.

11. Students dismissed from the School for academic reasons must reapply to the program to be considered for readmission.
POLICY AND PROCEDURES RELATED TO ACADEMIC CONDUCT

Introduction

Universities have a responsibility to protect: their educational purposes, the academic environment of the campus, and all members of the University community. To meet these responsibilities, a University must establish and enforce standards of conduct for its students. A University is obliged to establish reasonable standards for student conduct, for membership and continued membership in the University community, to deny membership to those applicants who do not meet these standards, and to impose reasonable disciplinary sanctions on students who are found guilty of violating these standards.

Policy

It is the prerogative of the School of Allied Health Professions, through the faculty, administrators, and other employees, to make decisions on the correct application of general policy statements and procedures to specific students under specific sets of circumstances. In making these decisions, both the rights of the student and the needs of the School in accomplishing its mission and educational goals must be considered. To this end, acts of academic or other misconduct, e.g., cheating, plagiarism, code of professional conduct violations, commission of a crime, etc., may subject the offending student to disciplinary action. To insure the consistent observance of due process, the following policy and procedures apply.

Definitions

1. “University” refers to the Louisiana State University (LSU) system.
2. “Health Sciences Center” refers to the Louisiana State University Health Sciences Center, including both the New Orleans and Shreveport campuses.
3. “School” refers to the School of Allied Health Professions, including both the New Orleans and Shreveport campuses.
4. “Department” refers to the specific department within the School of Allied Health Professions in which a given student is enrolled.
5. “Days” refers to official LSU Health Sciences Center working days.
6. Any reference herein to the singular shall also include the plural.

General Provisions

1. Equal treatment guaranteed to students by the 14th Amendment to the Constitution of the
United States of America requires that the same policies, procedures, and practices be used to consider all allegations of misconduct and also requires the imposing of "like sanctions for like violations" on all students found guilty of misconduct. This obligation of the School can be fulfilled only if each instructor reports suspected misconduct to the designated office in accordance with the provisions of this document. Consistent with this obligation, no disciplinary sanction shall be imposed upon a student except in accordance with the provisions of this document. Thus, it is contrary to School policy for an instructor to assign a disciplinary grade, such as an "F" or zero on an assignment, test, examination, or course as a sanction for admitted or suspected academic dishonesty, in lieu of formally charging the student with academic misconduct under the provisions described herein.

2. Any time limit set forth in this procedure may be extended by mutual written agreement of the Dean and the student.

3. This policy applies to the School of Allied Health Professions, New Orleans and Shreveport campuses. Infractions shall be reported as follows:
   - New Orleans campus - Associate Dean for Academic Affairs
   - Shreveport campus - Executive Associate Dean for Shreveport

4. Infractions will be resolved on the campus where the student is enrolled.

5. The Associate Dean for Academic Affairs shall chair the hearing panel of the Committee on Student Conduct on the New Orleans campus. The Executive Associate Dean for Shreveport shall chair the hearing panel of the Committee on Student Conduct on the Shreveport campus.

6. Under exceptional circumstances, the Dean may appoint someone other than either the Associate Dean for Academic Affairs or the Executive Associate Dean for Shreveport to serve in his/her place.

**Academic and Professional Conduct**

Students are expected to:
- Exhibit the highest standard of personal, academic, professional and ethical behavior.
- Treat faculty, staff, peers, clients, patients, and others with dignity and respect.
- Abide by the Code of Conduct that applies to their specific Allied Health discipline.
- Comply with rules, codes, policies, technical standards set by the Department, School, campus and University.

Students who violate any of the above when involved in any School or School related activity/function whether on or off campus will be subject to disciplinary action as prescribed in this document.

**Academic Misconduct**

Academic misconduct includes, but is not limited to, the following:
1. Copying from another student's test paper
2. Using the course textbook or other materials such as a notebook normally brought to a class meeting but not authorized for use during a test by the person giving the test.

Having such forbidden material open and in sight of the student will be considered prima
facie evidence of use

3. Attempting to commit, or to be an accessory to the commission of, an offense listed above

4. Collaborating during a test with any other person by giving or receiving information without authority

5. Using specially prepared materials, e.g., notes, formula lists, notes written on the student's clothing or body, during a test. Bringing such forbidden material to a test will be considered prima facie evidence of use or attempted use

6. Stealing, buying or otherwise obtaining, all or part of an unadministered test, including answers to an unadministered test

7. Possession/distribution of all or part of an unadministered test

8. Bribing any other person to obtain an unadministered test or information about a test

9. Substituting for another student, or permitting any other person to substitute for oneself, to take a test

10. Submitting as one's own, in fulfillment of academic requirements, any theme, report, term paper, essay, other written work, drawing, or other scholastic work prepared totally or in part by another

11. Selling, giving or otherwise supplying to another student for use in fulfilling academic requirements any theme, report, term paper, or other work

12. Changing, altering or being an accessory to the changing and/or altering a grade in a grade book, on a test paper, on other work for which a grade is given, on a "drop slip" or other official academic records

13. Proposing and/or entering into an arrangement with an instructor to receive a grade of "F" or any other reduced grade in a course, on a test or any other assigned work in lieu of being charged with academic misconduct under the provisions of this policy

14. Plagiarizing is the unacknowledged inclusion, in work submitted for credit, of someone else's words, ideas or data. When a student submits work for credit that includes the words, ideas or data of others, the source of this information must be acknowledged through complete, accurate and specific references, and, if verbatim statements are included, through quotation marks. Failure to identify any source, published or unpublished, copyrighted or uncopyrighted, from which information, terms, phrases or concepts have been taken, constitutes plagiarism. By placing his or her name on work submitted for credit, the student certifies the originality of all work not otherwise identified by appropriate acknowledgments through appropriate referencing.

15. Falsification, fabrication or dishonesty in reporting clinical, laboratory and research reports

16. Submitting substantially the same work for credit in more than one course

17. Violation of course rules as established by the School, Department or course instructor

18. Attempting to commit, or to be an accessory to, the commission of an offense listed above

19. Violation of any other LSU Health Sciences Center academic rules or regulations

Students who violate any of the above when involved in any School or School related activity/function whether on or off campus will be subject to disciplinary action as prescribed in this document.
Professional Misconduct

To protect the University’s educational purposes and the University community, a student may be formally charged with a violation of this policy and be subject to the sanctions herein when:

1. Strong and convincing evidence that the student’s continued presence at the University is potentially dangerous to the health and safety of the University community.
2. The student is convicted of a felony.
3. The student is formally charged by civil authorities with the commission of a felony of such nature that the student’s continued presence at the University is potentially dangerous to the health and safety of the University community.
4. The student is in possession of dangerous weapons/devices including but not limited to firearms, explosives, toxic substances, etc. on school property or other property e.g. clinical site where a school activity/function is conducted.
5. The student engages in acts of sexual misconduct including but not limited to sexual harassment, lewd, indecent, and/or obscene behavior.
6. The student engages in behavior that disrupts the learning environment including but not limited to refusing to comply with instructions, course requirements, behaving in a physically threatening manner, making oral/written threats, etc.
7. The student violates any other LSU Health Sciences Center rules or regulations pertaining to Professional Conduct.

Procedure

Reporting Student Misconduct

1. An instructor, employee or student who has evidence to justify a charge of misconduct, shall present the evidence to the Office of the appropriate Associate Dean within 5 days of the alleged misconduct.
2. An allegation of misconduct must be in writing and signed by the individual making the allegation in order to proceed to the next step.
3. The appropriate Associate Dean/the Dean or his/her designee will discuss the circumstances and evidence surrounding the alleged violation with the person bringing the charge.
Charging a Student with Misconduct

1. After reviewing the evidence pertaining to the alleged violation, the appropriate Associate Dean will then discuss the charge with the student involved. If the evidence is sufficient to justify such action, the student will be informed that the School of Allied Health Professions will bring formal charges against him or her.

2. The student will be provided with a written statement of the formal charge against him/her. The allegation will be referred to the Committee on Student Conduct. If the student meets the criteria noted under the section entitled "The Administrative Hearing", he/she may request that the Dean accept administrative jurisdiction.

Referral to a Hearing Panel

After being informed of the formal charge, if the student does not request that the charge be resolved administratively, or the Dean does not accept jurisdiction, the appropriate Associate Dean will refer the charge to a hearing panel of the Committee on Student Conduct within 5 days.

Interim Grade

A grade of “I” (incomplete) will be assigned, if necessary, until the Dean has rendered his/her final decision.

Committee on Student Conduct

1. An Ad Hoc Committee, which shall be advisory to the Dean and consist of the appropriate Associate Dean, three faculty members, and two students shall meet to consider the case within 10 days of referral to the hearing panel of the Committee on Student Conduct.

2. Faculty members of the Committee on Student Conduct shall be selected by the appropriate associate dean on each campus, by lot from the pool of full time faculty members within the School of Allied Health Professions. No more than one faculty member of the Committee may be a member of the accused student’s department.

3. Student members shall be appointed by an officer of the Student Government Association of the School of Allied Health Professions. Students serving on the hearing panel may not be from the accused student’s Department. Graduate students will review allegations of misconduct against graduate students and undergraduate students will review allegations of misconduct against undergraduates.

4. The appropriate Associate Dean shall serve as chairperson of the Committee and be responsible for setting up the hearing, informing concerned parties and the Committee member of the time and place of the hearing. The chairperson will insure that the hearing is audio taped, a mechanical malfunction, however, will not invalidate the procedure.

5. The accused student may be accompanied by an advisor at the hearing. The advisor may speak to his/her advisee during the hearing but may not speak for the accused student or question committee members or those offering evidence.

6. At the hearing, evidence of alleged misconduct will be presented. The accused student
may present evidence in his/her defense; question those who present evidence against him/her and; refute evidence against himself/herself. The Committee may question all those who offer evidence. The Chairperson will insure that the scope of the hearing and evidence presented relate to the charge of misconduct.

7. After all evidence has been presented the Committee will meet in executive session to deliberate and formulate its recommendation to the Dean. The Committee may choose one or more sanctions listed in this document as its recommendation.

8. The Committee Chairperson shall submit a written report to the Dean including: the Committee's finding; recommendation; summary of the evidence presented; and dissenting opinions within five days of the hearing.

The Administrative Hearing

1. As noted earlier under the section titled "Charging a Student with Misconduct", after the student is formally charged with academic misconduct, a request for an administrative hearing before the Dean can be made. This request must be made within two days of receipt of the formal charge.

2. The following specific conditions must be met before the Dean can accept jurisdiction.

3. The student must:
   a) Request in writing that the Dean take jurisdiction; and the Dean must be willing to accept the case as being appropriate for administrative resolution
   b) Officially plead guilty in writing to the specific charge as prepared by the Office of the Associate Dean
   c) Waive his or her right in writing to have the charge considered by a hearing panel of the Committee on Student Conduct

Action by the Dean

1. Independent of the method used, i.e., hearing panel or administrative jurisdiction, the Dean will render a final decision consistent with the following schedule: 1) within five days of receipt of the hearing panel's report, or 2) within 10 days of accepting administrative jurisdiction.

2. The Dean has the authority to impose sanctions other than those recommended by the Committee on Student Conduct, and determine when sanctions will be imposed, e.g., immediately, at the end of the semester.

3. The Dean’s final decision, plus a copy of the Committee’s findings and recommendations, shall be distributed to the student involved, the appropriate Associate Dean, and other appropriate administrators.

Appeal

As a matter of right a student may appeal the decision of the Dean. An appeal must be made to
the Vice-Chancellor for Academic Affairs of the LSU Health Sciences Center within 15 days of the decision of the Dean. The written appeal must include:

1) A justification for the appeal, e.g. evidence of abuse of process, evidence of procedural error, etc.
2) The Dean’s final decision plus a copy of the committee’s finding and recommendations

The Vice-Chancellor for Academic Affairs shall decide within two weeks after receipt of appeal whether further action should be taken. In reaching this decision, this official may ask other parties to the appeal to make written reply to the request for a review or these parties, on their own, may make a written reply. If the decision is reached that a review is not justified, the student and all other parties will be so notified. If the Vice Chancellor for Academic Affairs decides to respond favorably to the petition for review, this official will hold a formal meeting with all parties and their advisors, if desired, and reach a decision based on discussions at this meeting, as well as on all written materials furnished. Once a decision is reached, the Vice Chancellor for Academic Affairs will notify all parties, plus the Dean, of the decision. The decision of the Vice Chancellor for Academic Affairs shall conclude the matter, subject to the right of the Chancellor to review the case. The Chancellor will consider the case only on the basis of a petition for review following the procedure outlined above.

**Sanctions for Academic Misconduct**

Sanctions imposed on the student may include one or more of the following disciplinary actions:

1. Be required to show active participation in the work of counseling
2. Retake test, or repeat work in question
3. Lower letter grade by one letter, e.g. A to B
4. Lower letter grade by two letters, e.g. A to C
5. Complete given activities/assignments consistent with the Dean’s decision
6. Receive a failing grade for the course in which the infraction occurred. If this sanction is imposed and the policy of the Department stipulates that when “a student receives a less than satisfactory grade in a course he or she may not continue in the program sequence”, then the Department policy shall also apply
7. Suspension from the School of Allied Health Professions. Period of suspension to be determined by the Dean
8. Dismissal from the School of Allied Health Professions.

**Sanctions for Professional Misconduct**

Sanctions imposed on the student may include one or more of the following disciplinary actions:

1. Be required to show active participation in the work of counseling
2. Disciplinary Warning: verbal or written notification that the student has not met the School’s standards of conduct, and that a repeat offense will result in more serious disciplinary action. It is not the case that first offenses automatically receive a warning; most first offenses receive a stricter response, with warnings reserved for cases with unusual mitigating circumstances
3. Reprimand: a written statement censuring a student for violating School regulations, and stating that another offense will result in more serious action. This is normally considered a lenient response, even for first offenses.

4. Restitution: requirement that the student compensate the School or other persons for damages, injuries, or losses. Failure to comply results in canceled registration and a hold on future registration.

5. Disciplinary Probation: an action that places conditions on the student’s continued enrollment in the School, including the statement that further violation of School policies will likely result in dismissal. The Committee fixes the term and conditions of academic probation. First offenses often result in probation.

6. Suspension from the School of Allied Health Professions. Period of time to be determined by the Dean.

7. Dismissal from the School of Allied Health Professions.
POLICY AND PROCEDURES RELATED TO STUDENT CONDUCT

I have received a copy of the document entitled LSUHSC School of Allied Health Professions Policy and Procedures Relating to Student Conduct.

_______________________________
Print Name

_____________________________                          ____________________
Signature                          Date
The faculty at LSUHSC – New Orleans, School of Allied Health Professions, Department of Occupational Therapy, welcomes you to the professional portion of your academic education. As a professional program, expectations of students are somewhat different from those you may have experienced in the pre-professional portion of your education. The following policies and guidelines are provided to assist you in understanding our expectations for your professional behavior.

**Professional Behavior**

1. **Class attendance is required.** Students are expected to provide advanced notice of absences or a reasonable explanation to the faculty member whose class is missed *as soon as possible* (and not later than 24 hours) after the missed class. In case of serious illness, or other emergencies, the student will need to directly inform his/her instructor via personal email or phone. If the faculty member is not available, the student will need to leave a message with the office staff of the Occupational Therapy Department for that faculty member at (504) 568-4302. If a serious illness or emergency occurs on a day the student is scheduled for fieldwork or observations, it is the student's responsibility to inform the fieldwork supervisor at the facility, as well as the course instructor. Timelines for notification referred to above should be followed. Missed fieldwork may be required to be made-up. In the event of serious illness or emergency, the student and instructor will develop a written plan for making up missed fieldwork.

2. **E-mail requirements.** Upon registration in the program, each student is assigned an e-mail account through LSUHSC. Students will be required to use their LSUHSC e-mail accounts for registration purposes, and to receive messages from the School and the Department. It is expected that the student correspond with faculty members through their LSUHSC e-mail account. Students are expected to check their e-mail at least once daily. Please refer to the information provided by the Information Technology Department in the School of Allied Health Professions (SAHP) for the “Guidelines for the Development of Passwords”.

3. **In-class computer use.** Courses may require the use of laptops for classroom activities, including exams, quizzes, or other classroom activities. Please refer to course syllabi for specific policies for laptop use and communicate with the course coordinator/
instructor for answers to specific questions. When laptops are used in class, it is expected to be for school classroom activities only. Any student using a computer during class for non-school related activities will be excused from the classroom. Students failing to comply with this policy will be reported to the Dean’s office, Department Head, and/or appropriate designee for disciplinary action and may be subject to dismissal from the program.

4. **Student purchase of textbooks is required.** Each semester, students are provided with a book list needed for each course for the upcoming semester. Textbooks are indicated as being required or recommended. Students must obtain all required books for each semester, as assigned readings must be completed before coming to the class session. The majority of the books purchased will be used over multiple semesters and will be excellent resources for fieldwork and clinical practice.

5. **Cell phones are to be turned off during all classes and during all meetings with faculty.** In the rare case of an emergency, the student is to ask for permission from the faculty member in charge of a given class or meeting to keep a cell phone turned on in order to receive the emergency call.

6. **Proper attire is required for all classroom, laboratory, and clinic sessions.** Patients/clients frequent the LSU Health Sciences Center daily. Therefore, students are required to dress in attire suitable for the professional environment in which their classes are held, not just during visits to clinical sites away from campus. Bare feet, short shorts or skirts (closer to hip than knee), tank tops, spaghetti straps, tube tops, athletic wear, yoga pants, and other revealing outfits are not considered professional or acceptable attire. Leggings are appropriate for class only when worn with a shirt that is long enough to cover the student’s back side. Faculty will give instructions for laboratory, fieldwork dress, and presentation attire as indicated. Long hair should be pulled back when in situations where clients are involved. **Artificial fingernails** cannot be worn when providing hands-on patient care or during fieldwork.

During the department’s Neurological Clinic, students are required to wear scrubs or full-length pants with a polo-style shirt, socks, and closed-toe shoes. No dresses, skirts, jeans, shorts, or leggings.

7. **Students MUST respect the confidentiality of their clients/patients, colleagues and faculty.** The student is required to respect the dignity, individuality, privacy and personality of each and every individual. Information about a client should be shared on a “need to know” basis only, and not for reasons of personal interest. In other words, in order to provide services, it is necessary for various professional personnel to know personal information about a client. If a client’s information is discussed related to official class business (e.g., during seminars, classes), the client’s identity must remain anonymous; and information about the client that is not necessary to the learning situation must not be shared, (e.g., identity of known relatives, legal or moral issues not related to OT services being rendered). This is also true about personal discussions that students participate in during class time. Students are expected to respect the confidentiality and
privacy of your classmates. Health Insurance Portability and Accountability Act (HIPAA) guidelines must be adhered to at all times.

8. **Unprofessional, unethical, and illegal conduct** of any kind, including cheating on examinations or classroom assignments, plagiarism, and theft, etc., will subject the offending student to appropriate disciplinary measures that can include expulsion. (See the Student Handbook under LSUHSC School of Allied Health Professions Policy and Procedures Relating to Academic Misconduct.)

9. **Professional membership.** Being part of a profession required that one displays various professional behaviors.
   a. Students are expected to treat fellow students and other colleagues in a professional manner, meaning with respect and dignity. Disrespectful behaviors are not tolerated.
   b. Professionals are expected to be life-long learners. They are also expected to participate in their respective professional organizations. All students are required to become members of the American Occupational Therapy Association (AOTA) and the Louisiana Occupational Therapy Association (LOTA). It is strongly encouraged that students become members of the Student Occupational Therapy Association (SOTA).

10. **Hall conduct.** Students need to be cognizant when talking and gathering in the halls, as noise travels easily. We ask that they make an effort to keep the noise at a minimum, particularly since we share the floor other colleagues.

11. **Classrooms.** Students are expected to demonstrate respect for the School and courtesy to others. Students are expected to take adult responsibility for keeping the classrooms free of trash and debris, i.e., soft drink cans, papers, etc. Bulletin boards are intended for the display of instructional and professional materials, not personal or social items.

12. **Waiting Room/Student Lounge.** Students may occupy the room off the elevators that is a combined client waiting room/student lounge. The microwave and refrigerator in that room are for student use on the condition that students keep them clean at all times. Any food that is left in the refrigerator or in that room must be marked with the student’s name. **Food items that are left in the refrigerator or in the waiting room/student lounge without a name attached are to be discarded by students.** The student refrigerator and microwave are to be emptied and cleaned at the end of each semester and cleared at the end of each week during hurricane season (June 1 to November 30). It is the responsibility of the students to see that these tasks are performed on a regular basis. Failure to keep both items clean may result in the termination of the use of these items.

13. **The use of alcohol is prohibited** in classroom buildings, laboratories, auditoriums, library buildings, faculty and administrative offices, athletic facilities, and all other public campus areas. Alcohol may be served for special events on campus with written authorization from the Dean, Chancellor, or their authorized designee.
14. The unauthorized use of, possession of, or being under the influence of alcohol and the illegal use, abuse, possession, manufacture, dispensation, distribution of, or being under the influence of controlled or illegal drugs is prohibited while at work, on call, on duty, at school, or engaged in LSU Health Sciences Center – New Orleans campus business on or off LSUHSC-NO premises.

15. We are committed to a Violence Free Workplace. Consistent with this policy, it is illegal and expressly prohibited to engage in the unauthorized carrying of a firearm or a dangerous weapon, by a student or non-student on University property at anytime. This includes, but is not necessarily limited to, school sponsored functions or in a firearm-free zone. Violators will be arrested and prosecuted to the fullest extent of the law.

16. LSUHSC – New Orleans is 100% tobacco-free, both indoors and out.

**General Policies and Guidelines:**

1. **Faculty**
   a. Appointments with a faculty member outside of class:
      1) It is preferred that students make non-emergency appointments with faculty members in advance.
      2) Faculty members are available on an as-needed basis or at designated office times. Students or faculty may initiate a meeting.
      3) The student or faculty member will need to make an appointment at a time that is convenient to both parties. If a message is sent via email, indicate two to four possible meeting times in order to expedite the process of establishing an appointment.
   b. When a faculty member's door is closed, it is often because he or she is addressing job related responsibilities requiring privacy or time away from the office. If a faculty member's door is open, it is expected that students knock before entering and requesting to speak with the faculty member.
   c. Students are not permitted in faculty offices or in the Copy Room unsupervised.
   d. Students should meet with the faculty member(s) responsible for a course to discuss course-specific policies and procedures. Students may elect to have their advisor present at such meetings. If a student is not satisfied with the results of a meeting with a faculty member, he or she may then discuss the issue with the Department Head. For information about academic appeals, students can refer to that section under the School of Allied Health Professions in the LSUHSC Catalog/Bulletin also available in Student Handbook.

2. **Written reports** are required to be written in APA style according to the *Publication Manual of the American Psychological Association*, 6th Edition, unless otherwise indicated by the course instructor. Students are required to purchase a personal copy.

3. **Building access.** Students have access to the OT lab 24-7. Please use the buddy system
for safety. All other areas of the Department are off-limits after 4:30 and on weekends, unless faculty approval has been obtained.

4. **Campus emergency phone numbers** are placed in all classrooms and on bulletin boards.

5. **Mail boxes** are provided for students in the OT Lab. Please check your boxes regularly. Faculty mailboxes are located in the Main OT Office.

6. **Computer access.** Computers are available for student use in the LSUHSC library and in the OT Student Computer Lab. Other Department equipment is off-limits to students unless faculty or staff permission is received.

7. **Photocopy use.** Photocopies for student use must be made on the 6th floor or in the LSUHSC Library.

8. **Fieldwork.** Expenses may be incurred by students enrolled in Fieldwork Experiences in off-campus or out-of-state health care facilities. These expenses are the responsibility of the individual student and SHOULD BE ANTICIPATED. Please refer to the Level I and Level II Student Fieldwork Handbooks for specifics related to fieldwork, such as background checks, drug screens, malpractice insurance, CPR certification, etc.

9. **Employment.** Fulfillment of the requirements for the MOT degree requires a serious commitment of time and effort. Therefore, employment is discouraged, especially weekday employment. Students are encouraged to carefully weigh and manage their responsibilities at home, school, work, etc. while in the program.

10. **Student Organizations.** All students are eligible to be a member of the Student Occupational Therapy Association. Qualifying students will also be eligible for the national honor society for occupational therapy, Pi Theta Epsilon. More information regarding student organizations and opportunities to participate within the School, University, and community will be distributed throughout the program.

11. **Representation of the LSUHSC Occupational Therapy Department.** Any fundraising completed in the name of the department, school, or institution must receive approval through Academic Affairs (Dr. Erin Dugan, Associate Dean). Forms are available on the school’s website. Any promotional materials should be approved by the Department Head of OT.

12. **SAFETY TIPS.** Theft is common in and around the LSU Health Sciences Center. Keep your property secure at all times, even when moving between classrooms. Do not leave your backpacks, purses, or bags in one classroom while in another. Lockers are available in the restrooms, but you need to supply your own combination lock. When walking to and from your vehicle, be vigilant of your surroundings. Attacks on persons are infrequent, but they do happen. If possible, do not walk alone, especially at night. The University Police will escort you if you request the service. **Look out for each other, and BE SAFE!!!!**
13. **Exit Interview.** Students are required to attend an exit interview at the completion of their program, and prior to graduation. Data will be collected that is required by ACOTE as part of the ongoing accreditation process. Details regarding the date and time of the interview are distributed in a timely manner leading up to the event.

1/18.KLA
Occupational Therapy Code of Ethics (2015)

Preamble

The 2015 *Occupational Therapy Code of Ethics* (Code) of the American Occupational Therapy Association (AOTA) is designed to reflect the dynamic nature of the profession, the evolving health care environment, and emerging technologies that can present potential ethical concerns in research, education, and practice. AOTA members are committed to promoting inclusion, participation, safety, and well-being for all recipients in various stages of life, health, and illness and to empowering all beneficiaries of service to meet their occupational needs. Recipients of services may be individuals, groups, families, organizations, communities, or populations (AOTA, 2014b).

The Code is an AOTA Official Document and a public statement tailored to address the most prevalent ethical concerns of the occupational therapy profession. It outlines Standards of Conduct the public can expect from those in the profession. It should be applied to all areas of occupational therapy and shared with relevant stakeholders to promote ethical conduct.

The Code serves two purposes:

1. It provides aspirational Core Values that guide members toward ethical courses of action in professional and volunteer roles, and
2. It delineates enforceable Principles and Standards of Conduct that apply to AOTA members.

Whereas the Code helps guide and define decision-making parameters, ethical action goes beyond rote compliance with these Principles and is a manifestation of moral character and mindful reflection. It is a commitment to benefit others, to virtuous practice of artistry and science, to genuinely good behaviors, and to noble acts of courage. Recognizing and resolving ethical issues is a systematic process that includes analysis of the complex dynamics of situations, weighing of consequences, making reasoned decisions, taking action, and reflecting on outcomes. Occupational therapy personnel, including students in occupational therapy programs, are expected to abide by the Principles and Standards of Conduct within this Code. Personnel roles include clinicians (e.g., direct service, consultation, administration); educators; researchers; entrepreneurs; business owners; and those in elected, appointed, or other professional volunteer service.

The process for addressing ethics violations by AOTA members (and associate members, where applicable) is outlined in the Code’s Enforcement Procedures (AOTA, 2014a).

Although the Code can be used in conjunction with licensure board regulations and laws that guide standards of practice, the Code is meant to be a free-standing document, guiding ethical dimensions of professional behavior, responsibility, practice, and decision making. This Code is not exhaustive; that is, the Principles and Standards of Conduct cannot address every possible situation. Therefore, before making complex ethical decisions that require further expertise, occupational therapy personnel should seek out resources to assist in resolving ethical issues not addressed in this document. Resources can include, but are not limited to, ethics committees,
ethics officers, the AOTA Ethics Commission or Ethics Program Manager, or an ethics consultant.

Core Values

The profession is grounded in seven long-standing Core Values: (1) Altruism, (2) Equality, (3) Freedom, (4) Justice, (5) Dignity, (6) Truth, and (7) Prudence. Altruism involves demonstrating concern for the welfare of others. Equality refers to treating all people impartially and free of bias. Freedom and personal choice are paramount in a profession in which the values and desires of the client guide our interventions. Justice expresses a state in which diverse communities are inclusive; diverse communities are organized and structured such that all members can function, flourish, and live a satisfactory life. Occupational therapy personnel, by virtue of the specific nature of the practice of occupational therapy, have a vested interest in addressing unjust inequities that limit opportunities for participation in society (Braveman & Bass-Haugen, 2009).

Inherent in the practice of occupational therapy is the promotion and preservation of the individuality and Dignity of the client, by treating him or her with respect in all interactions. In all situations, occupational therapy personnel must provide accurate information in oral, written, and electronic forms (Truth). Occupational therapy personnel use their clinical and ethical reasoning skills, sound judgment, and reflection to make decisions in professional and volunteer roles (Prudence).

The seven Core Values provide a foundation to guide occupational therapy personnel in their interactions with others. Although the Core Values are not themselves enforceable standards, they should be considered when determining the most ethical course of action.

Principles and Standards of Conduct

The Principles and Standards of Conduct that are enforceable for professional behavior include (1) Beneficence, (2) Nonmaleficence, (3) Autonomy, (4) Justice, (5) Veracity, and (6) Fidelity. Reflection on the historical foundations of occupational therapy and related professions resulted in the inclusion of Principles that are consistently referenced as a guideline for ethical decision making.

Beneficence

Principle 1. Occupational therapy personnel shall demonstrate a concern for the well-being and safety of the recipients of their services.

Beneficence includes all forms of action intended to benefit other persons. The term beneficence connotes acts of mercy, kindness, and charity (Beauchamp & Childress, 2013). Beneficence requires taking action by helping others, in other words, by promoting good, by preventing harm, and by removing harm. Examples of beneficence include protecting and defending the rights of others, preventing harm from occurring to others, removing conditions that will cause harm to others, helping persons with disabilities, and rescuing persons in danger (Beauchamp & Childress, 2013).
Related Standards of Conduct

Occupational therapy personnel shall

A. Provide appropriate evaluation and a plan of intervention for recipients of occupational therapy services specific to their needs.

B. Reevaluate and reassess recipients of service in a timely manner to determine whether goals are being achieved and whether intervention plans should be revised.

C. Use, to the extent possible, evaluation, planning, intervention techniques, assessments, and therapeutic equipment that are evidence based, current, and within the recognized scope of occupational therapy practice.

D. Ensure that all duties delegated to other occupational therapy personnel are congruent with credentials, qualifications, experience, competency, and scope of practice with respect to service delivery, supervision, fieldwork education, and research.

E. Provide occupational therapy services, including education and training, that are within each practitioner’s level of competence and scope of practice.

F. Take steps (e.g., continuing education, research, supervision, training) to ensure proficiency, use careful judgment, and weigh potential for harm when generally recognized standards do not exist in emerging technology or areas of practice.

G. Maintain competency by ongoing participation in education relevant to one’s practice area.

H. Terminate occupational therapy services in collaboration with the service recipient or responsible party when the services are no longer beneficial.

I. Refer to other providers when indicated by the needs of the client.

J. Conduct and disseminate research in accordance with currently accepted ethical guidelines and standards for the protection of research participants, including determination of potential risks and benefits.

Nonmaleficence

Principle 2. Occupational therapy personnel shall refrain from actions that cause harm.

Nonmaleficence “obligates us to abstain from causing harm to others” (Beauchamp & Childress, 2013, p. 150). The Principle of Nonmaleficence also includes an obligation to not impose risks of harm even if the potential risk is without malicious or harmful intent. This Principle often is examined under the context of due care. The standard of due care “requires that the goals pursued justify the risks that must be imposed to achieve those goals” (Beauchamp & Childress, 2013, p. 154). For example, in occupational therapy practice, this standard applies to situations in which the client might feel pain from a treatment intervention; however, the acute pain is justified by potential longitudinal, evidence-based benefits of the treatment.

Related Standards of Conduct
Occupational therapy personnel shall

A. Avoid inflicting harm or injury to recipients of occupational therapy services, students, research participants, or employees.

B. Avoid abandoning the service recipient by facilitating appropriate transitions when unable to provide services for any reason.

C. Recognize and take appropriate action to remedy personal problems and limitations that might cause harm to recipients of service, colleagues, students, research participants, or others.

D. Avoid any undue influences that may impair practice and compromise the ability to safely and competently provide occupational therapy services, education, or research.

E. Address impaired practice and when necessary report to the appropriate authorities.

F. Avoid dual relationships, conflicts of interest, and situations in which a practitioner, educator, student, researcher, or employer is unable to maintain clear professional boundaries or objectivity.

G. Avoid engaging in sexual activity with a recipient of service, including the client’s family or significant other, student, research participant, or employee, while a professional relationship exists.

H. Avoid compromising rights or well-being of others based on arbitrary directives (e.g., unrealistic productivity expectations, falsification of documentation, inaccurate coding) by exercising professional judgment and critical analysis.

I. Avoid exploiting any relationship established as an occupational therapy clinician, educator, or researcher to further one’s own physical, emotional, financial, political, or business interests at the expense of recipients of services, students, research participants, employees, or colleagues.

J. Avoid bartering for services when there is the potential for exploitation and conflict of interest.

Autonomy

Principle 3. Occupational therapy personnel shall respect the right of the individual to self-determination, privacy, confidentiality, and consent.

The Principle of Autonomy expresses the concept that practitioners have a duty to treat the client according to the client’s desires, within the bounds of accepted standards of care, and to protect the client’s confidential information. Often, respect for Autonomy is referred to as the self-determination principle. However, respecting a person’s autonomy goes beyond acknowledging an individual as a mere agent and also acknowledges a person’s right “to hold views, to make choices, and to take actions based on [his or her] values and beliefs” (Beauchamp & Childress, 2013, p. 106). Individuals have the right to make a determination regarding care decisions that directly affect their lives. In the event that a person lacks decision-making capacity, his or her autonomy should be respected through involvement of an authorized agent or surrogate decision maker.
Related Standards of Conduct

Occupational therapy personnel shall

A. Respect and honor the expressed wishes of recipients of service.
B. Fully disclose the benefits, risks, and potential outcomes of any intervention; the personnel who will be providing the intervention; and any reasonable alternatives to the proposed intervention.
C. Obtain consent after disclosing appropriate information and answering any questions posed by the recipient of service or research participant to ensure voluntariness.
D. Establish a collaborative relationship with recipients of service and relevant stakeholders, to promote shared decision making.
E. Respect the client’s right to refuse occupational therapy services temporarily or permanently, even when that refusal has potential to result in poor outcomes.
F. Refrain from threatening, coercing, or deceiving clients to promote compliance with occupational therapy recommendations.
G. Respect a research participant’s right to withdraw from a research study without penalty.
H. Maintain the confidentiality of all verbal, written, electronic, augmentative, and nonverbal communications, in compliance with applicable laws, including all aspects of privacy laws and exceptions thereto (e.g., Health Insurance Portability and Accountability Act, Family Educational Rights and Privacy Act).
I. Display responsible conduct and discretion when engaging in social networking, including but not limited to refraining from posting protected health information.
J. Facilitate comprehension and address barriers to communication (e.g., aphasia; differences in language, literacy, culture) with the recipient of service (or responsible party), student, or research participant.

Justice

Principle 4. Occupational therapy personnel shall promote fairness and objectivity in the provision of occupational therapy services.

The Principle of Justice relates to the fair, equitable, and appropriate treatment of persons (Beauchamp & Childress, 2013). Occupational therapy personnel should relate in a respectful, fair, and impartial manner to individuals and groups with whom they interact. They should also respect the applicable laws and standards related to their area of practice. Justice requires the impartial consideration and consistent following of rules to generate unbiased decisions and promote fairness. As occupational therapy personnel, we work to uphold a society in which all individuals have an equitable opportunity to achieve occupational engagement as an essential component of their life.

Related Standards of Conduct
Occupational therapy personnel shall

A. Respond to requests for occupational therapy services (e.g., a referral) in a timely manner as determined by law, regulation, or policy.

B. Assist those in need of occupational therapy services to secure access through available means.

C. Address barriers in access to occupational therapy services by offering or referring clients to financial aid, charity care, or pro bono services within the parameters of organizational policies.

D. Advocate for changes to systems and policies that are discriminatory or unfairly limit or prevent access to occupational therapy services.

E. Maintain awareness of current laws and AOTA policies and Official Documents that apply to the profession of occupational therapy.

F. Inform employers, employees, colleagues, students, and researchers of applicable policies, laws, and Official Documents.

G. Hold requisite credentials for the occupational therapy services they provide in academic, research, physical, or virtual work settings.

H. Provide appropriate supervision in accordance with AOTA Official Documents and relevant laws, regulations, policies, procedures, standards, and guidelines.

I. Obtain all necessary approvals prior to initiating research activities.

J. Refrain from accepting gifts that would unduly influence the therapeutic relationship or have the potential to blur professional boundaries, and adhere to employer policies when offered gifts.

K. Report to appropriate authorities any acts in practice, education, and research that are unethical or illegal.

L. Collaborate with employers to formulate policies and procedures in compliance with legal, regulatory, and ethical standards and work to resolve any conflicts or inconsistencies.

M. Bill and collect fees legally and justly in a manner that is fair, reasonable, and commensurate with services delivered.

N. Ensure compliance with relevant laws and promote transparency when participating in a business arrangement as owner, stockholder, partner, or employee.

O. Ensure that documentation for reimbursement purposes is done in accordance with applicable laws, guidelines, and regulations.

P. Refrain from participating in any action resulting in unauthorized access to educational content or exams (including but not limited to sharing test questions, unauthorized use of or access to content or codes, or selling access or authorization codes).

Veracity
**Principle 5. Occupational therapy personnel shall provide comprehensive, accurate, and objective information when representing the profession.**

Veracity is based on the virtues of truthfulness, candor, and honesty. The Principle of Veracity refers to comprehensive, accurate, and objective transmission of information and includes fostering understanding of such information (Beauchamp & Childress, 2013). Veracity is based on respect owed to others, including but not limited to recipients of service, colleagues, students, researchers, and research participants.

In communicating with others, occupational therapy personnel implicitly promise to be truthful and not deceptive. When entering into a therapeutic or research relationship, the recipient of service or research participant has a right to accurate information. In addition, transmission of information is incomplete without also ensuring that the recipient or participant understands the information provided.

Concepts of veracity must be carefully balanced with other potentially competing ethical principles, cultural beliefs, and organizational policies. Veracity ultimately is valued as a means to establish trust and strengthen professional relationships. Therefore, adherence to the Principle of Veracity also requires thoughtful analysis of how full disclosure of information may affect outcomes.

**Related Standards of Conduct**

**Occupational therapy personnel shall**

A. Represent credentials, qualifications, education, experience, training, roles, duties, competence, contributions, and findings accurately in all forms of communication.

B. Refrain from using or participating in the use of any form of communication that contains false, fraudulent, deceptive, misleading, or unfair statements or claims.

C. Record and report in an accurate and timely manner and in accordance with applicable regulations all information related to professional or academic documentation and activities.

D. Identify and fully disclose to all appropriate persons errors or adverse events that compromise the safety of service recipients.

E. Ensure that all marketing and advertising are truthful, accurate, and carefully presented to avoid misleading recipients of service, research participants, or the public.

F. Describe the type and duration of occupational therapy services accurately in professional contracts, including the duties and responsibilities of all involved parties.

G. Be honest, fair, accurate, respectful, and timely in gathering and reporting fact-based information regarding employee job performance and student performance.

H. Give credit and recognition when using the ideas and work of others in written, oral, or electronic media (i.e., do not plagiarize).

I. Provide students with access to accurate information regarding educational requirements and academic policies and procedures relative to the occupational therapy program or educational institution.
J. Maintain privacy and truthfulness when utilizing telecommunication in delivery of occupational therapy services.

Fidelity

**Principle 6. Occupational therapy personnel shall treat clients, colleagues, and other professionals with respect, fairness, discretion, and integrity.**

The Principle of *Fidelity* comes from the Latin root *fidelis*, meaning loyal. *Fidelity* refers to the duty one has to keep a commitment once it is made (Veatch, Haddad, & English, 2010). In the health professions, this commitment refers to promises made between a provider and a client or patient based on an expectation of loyalty, staying with the patient in a time of need, and compliance with a code of ethics. These promises can be implied or explicit. The duty to disclose information that is potentially meaningful in making decisions is one obligation of the moral contract between provider and client or patient (Veatch et al., 2010).

Whereas respecting Fidelity requires occupational therapy personnel to meet the client’s reasonable expectations, the Principle also addresses maintaining respectful collegial and organizational relationships (Purtilo & Doherty, 2011). Professional relationships are greatly influenced by the complexity of the environment in which occupational therapy personnel work. Practitioners, educators, and researchers alike must consistently balance their duties to service recipients, students, research participants, and other professionals as well as to organizations that may influence decision making and professional practice.

**Related Standards of Conduct**

**Occupational therapy personnel shall**

A. Preserve, respect, and safeguard private information about employees, colleagues, and students unless otherwise mandated or permitted by relevant laws.

B. Address incompetent, disruptive, unethical, illegal, or impaired practice that jeopardizes the safety or well-being of others and team effectiveness.

C. Avoid conflicts of interest or conflicts of commitment in employment, volunteer roles, or research.

D. Avoid using one’s position (employee or volunteer) or knowledge gained from that position in such a manner as to give rise to real or perceived conflict of interest among the person, the employer, other AOTA members, or other organizations.

E. Be diligent stewards of human, financial, and material resources of their employers, and refrain from exploiting these resources for personal gain.

F. Refrain from verbal, physical, emotional, or sexual harassment of peers or colleagues.

G. Refrain from communication that is derogatory, intimidating, or disrespectful and that unduly discourages others from participating in professional dialogue.

H. Promote collaborative actions and communication as a member of interprofessional teams to facilitate quality care and safety for clients.
I. Respect the practices, competencies, roles, and responsibilities of their own and other professions to promote a collaborative environment reflective of interprofessional teams.

J. Use conflict resolution and internal and alternative dispute resolution resources as needed to resolve organizational and interpersonal conflicts, as well as perceived institutional ethics violations.

K. Abide by policies, procedures, and protocols when serving or acting on behalf of a professional organization or employer to fully and accurately represent the organization’s official and authorized positions.

L. Refrain from actions that reduce the public’s trust in occupational therapy.

M. Self-identify when personal, cultural, or religious values preclude, or are anticipated to negatively affect, the professional relationship or provision of services, while adhering to organizational policies when requesting an exemption from service to an individual or group on the basis of conflict of conscience.

The Department of Occupational Therapy at Louisiana State University Health Sciences Center (LSUHSC) regards honesty and integrity as qualities essential to the practice of occupational therapy. The Honor Code governs student conduct during all academic activities. Upon admission to the program, students must agree to abide by the Honor Code. Students who violate the code violate this agreement, and incur the sanction imposed by the LSUHSC School of Allied Health Professions Policy and Procedures Related to Student Conduct (See Student Handbook on the Department’s website). Examples of conduct that are regarded as being in violation of the Honor Code include, but are not limited to:

a) Copying from another’s examination paper or allowing another to copy from one’s own paper, or using unauthorized aids (e.g., electronic, printed, or hand written materials) during an examination.

b) Unauthorized collaboration, e.g., working together on an assignment after the instructor has stated that work should be completed independently, without assistance.

c) Plagiarism; representing as one’s own work the work of another.

d) Revising and resubmitting graded work for regrading without the instructor’s knowledge and consent.

e) Giving or receiving unauthorized aid on a take-home or make-up examination, i.e., talking about examination answers with a classmate.

f) Giving or receiving aid on an academic assignment under circumstances in which a reasonable person would consider as not permitted.

EACH STUDENT AGREES TO:

1. Not seek an unfair advantage over other students, including but not limited to giving or receiving unauthorized aid during completion of academic requirements.

2. Prior to starting an assignment, consult with faculty and other sources to clarify the meaning of plagiarism. Learn the standard techniques of proper reference to sources used in the preparation of written work.

3. Clarify with an instructor, when in doubt, as to what is considered unauthorized aid, e.g., receiving assistance when writing an independent (versus group) paper; using other than authorized resources when taking an open-book test.
4. Truthfully represent fact and self at all times.

5. Respect the personal rights and property of others.

6. Actively see that he or she, and other students, uphold the spirit and letter of the Honor Code.

7. Read and familiarize oneself with the LSUHSC School of Allied Health Professions Policy and Procedures Related to Student Conduct.

8. Sign a pledge on all graded academic work certifying that no unauthorized assistance has been received or given in the completion of the work. Specifically, on each assignment and examination that is submitted for a grade, the student shall write, “Pledge”, then sign his or her name. This will signify that the work has been completed in adherence with the Honor Code. It is at the discretion of each instructor whether or not to grade unsigned work.

EACH FACULTY MEMBER AGREES TO:

1. Adhere to the Honor Code in every course, with all students, at all times.

2. Abide by the LSUHSC School of Allied Health Professions Policy and Procedures Related to Student Conduct.

3. Identify in advance of any graded examination and assignment what is considered authorized materials for use in completing the required work.

4. Inform students of your requirement as to whether or not they will need to write “Pledge” and sign their names on every examination and assignment submitted for a grade.

5. Exercise reasonable security and precaution in preparing, disseminating, and collecting examinations (including make-up examinations) so as to insure the integrity of the examination.

6. Take reasonable steps when administering an examination that will minimize the possibility of cheating, i.e., space tables, remove unauthorized materials from the testing area prior to distribution of the test, use of lock-down browser for electronic testing, authorized faculty proctor, etc.

I agree to abide by this Honor Code
